Building Capabilities in Complex Environments

Mark Costello, Chair Western BIM Region
Cillian Kelly, Co-Chair Eastern BIM Region

CitA BIM Gathering 2017, Croke Park, November 23rd & 24th, 2017

What will the site deliver to industry?

- The BIM regions new website is a central location for all of the BIM region across Ireland to deliver a clear and focused message to industry.
- The site will encourage collaboration and share information across different regions.
- The site will deliver a platform for sharing best practice resources with the wider BIM community.
- In addition to this the site will raise awareness of BIM and promote a shared understanding of the issues we are facing in relation to BIM implementation.

Regional Events:

HOME

ABOUT

CITA

REGIONAL EVENTS

BIM REGIONS BLOG

- Regional events will provide an industry calendar for all regional events across industry from BIM Regions events to Construction and Engineer events.
- This will be maintained by CitA administration.

BIM Regional Blog:

ABOUT

CITA

REGIONAL EVENTS

BIM REGIONS BLOG

- BIM Regions Blog will provide an online facility for debate and comment on key topics of discussion.
- This is a great platform for industry professionals & third level education to post a topic of choice and share the link across social media to get industry feedback and comments on the topic.
- Topics will be issued to CitA for upload and then industry is free to upload comments and share across social media.

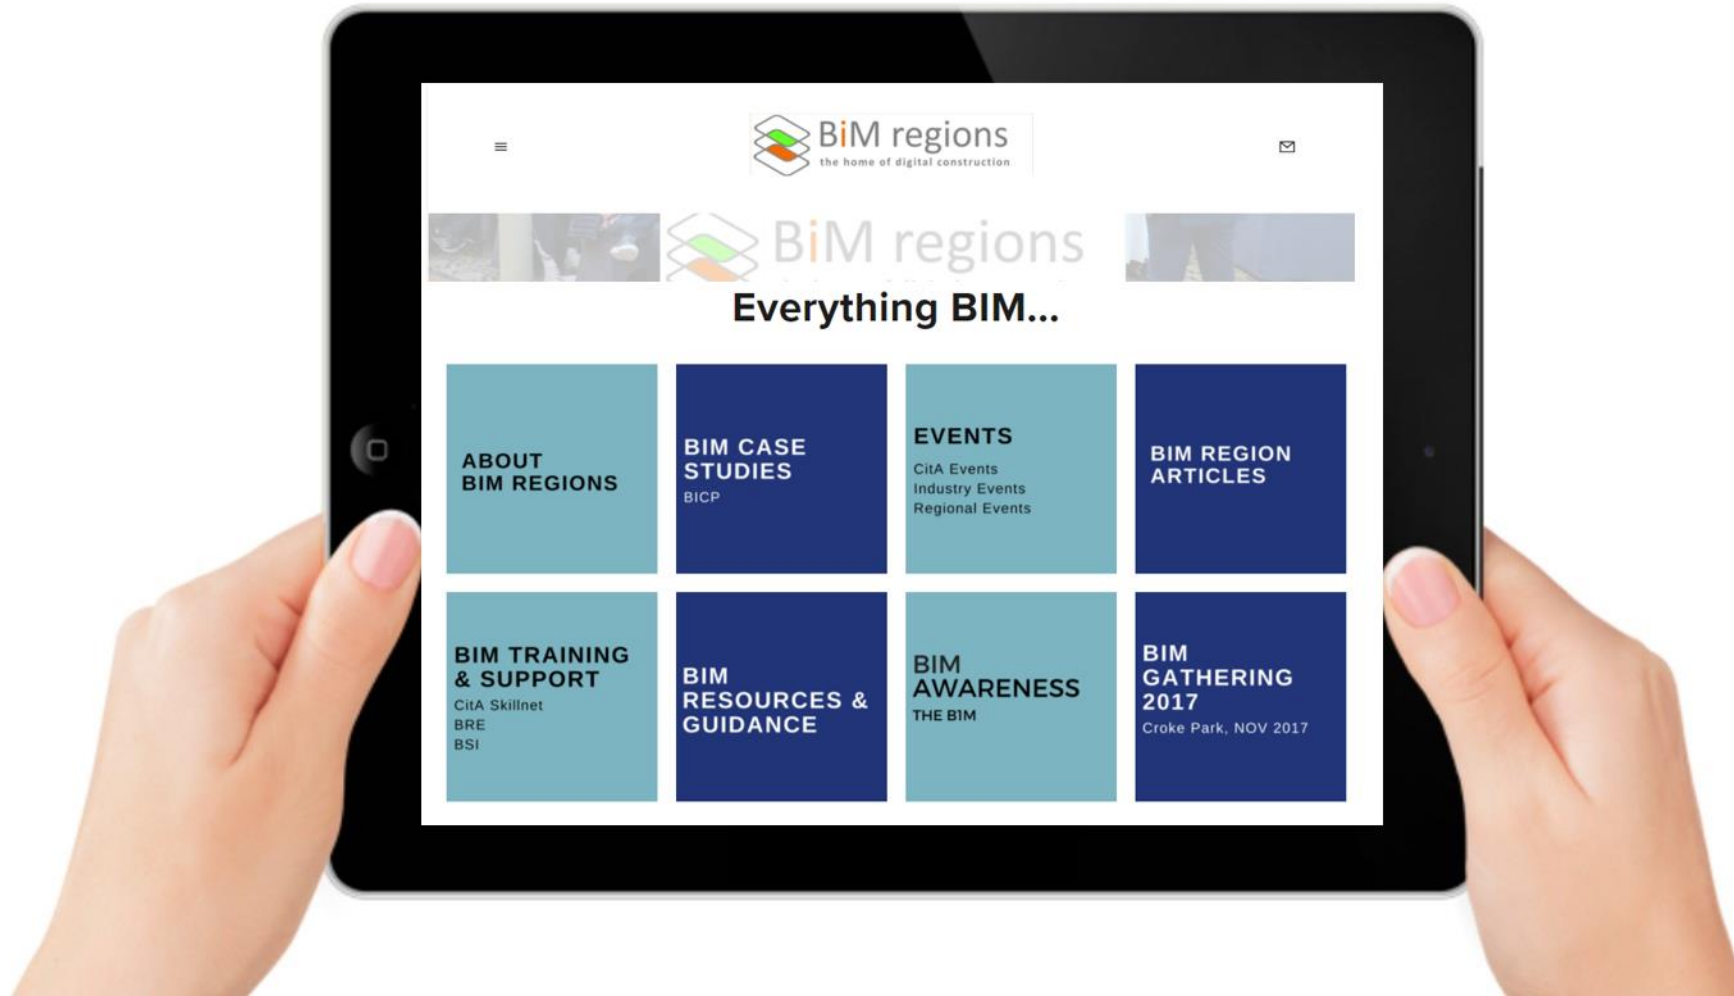

BIM Regions:

- BIM Regions is the location where you can find out about your BIM Region and meet the Steering Committee from each region.
- Each region will have link to their social media accounts where you can find out more about your region. Including Twitter and LinkedIn.

Everything BIM:

- This will provide you with some background on the BIM Regions,
- BIM Case from across the industry in collaboration with the BICP.
- Events will provide you with information on events from across the industry including CitA event,
- Regional Event and Industry events across Ireland and the UK.
- This will be maintained by CitA administration so please feel free to send details on your next event to Cita admin@cita.ie and we will upload and share information on your next event.

Everything BIM...

Everything BIM:

- BIM Regions Articles is a location for BIM Region article published from BIM Ireland.ie with topics from across the industry.
- BIM Training and support will provide links to external website such as CitA Skillnet, BRE Academy & BSi;

BIM Training & Support

Find information on BIM training and support on the following websites:

Collaborative production of architectural, engineering and construction information. Code of practice

BIM Awareness:

- The BIM Awareness tab will direct you to the “The B1M” website where you can access short informative videos on BIM awareness on topics such as “What is a BIM Model” to “BIM Protocol Explained”.
- The B1M has welcomed the collaboration with the BIM Regions Ireland and has mentioned that their website content has now diversified to cover the wider construction industry (as well as BIM).

THE BIM VIDEOS BIM FOR BEGINNERS ABOUT MORE

BIM FOR BEGINNERS

If you're new to BIM... start here!

UK Ireland

BIM stands for 'building information modelling'.

To find out more about what that is and what it means for you, watch these videos in the order we've laid out.

PART 1 - WHAT ARE YOU ON ABOUT?

Building Information Modelling

In the context of construction, BIM is the process of delivering and operating built assets using well-structured digital information that all the necessary parties have access to.

It is a way of working, rather a physical object or an entity.

Who made the decision to build the site?

- As part of the goals for the Eastern BIM Region the Steering Committee agreed that a website for BIM region Ireland would be the main goal for 2017.
- This was led by Co-Chair Cillan Kelly in collaboration with the BIM Regions, CitA, the BICP and “The B1M”.
- Each region was contacted directly and asked to join the website as a central location for for sharing best practice resources with the wider BIM community.

“We are delighted with the grate work that has been put in from everyone that has contributed to the website. We look forward to the developments of the website in the future and we fell the BIM Regions Blog will be a key asset to the industry and we will promote this Blog in third level education across the country.”

Who is involved in running the site?

- Content is provided by industry experts and academia reviewed by the Group before sending to CitA to upload.
- The BIM Regions is responsible providing information on upcoming regional events.
- CitA are responsible for maintaining the site including updating content.

How often is it updated?

- The BIM Regions website is a live website and will be updated on an ongoing basis, Steering Committee members will discuss additions and updates at each group meeting

Why did the regions need a site?

- Earlier this year the Eastern BIM Region set out their goals and the website was the main goal for 2017. We felt that there was a lot of discrepancy on BIM awareness across the country and we wanted to deliver a clear message to industry.

“The BIM Regions are a collaboration of specialist interest groups who will champion BIM in their respective specialist areas. Their purpose is to raise awareness of BIM, promoting a shared understanding of the value proposition and issues affecting the implementation of BIM in their respective areas of interests. The BIM Regions will seek to develop consistency of messaging in a clear and concise manner to support both new and existing professionals in their respective BIM journeys.”

- After a review of the charter we felt that a central website would be the best way to meet deliver the BIM 4 Communities Charter which was signed by each BIM region when the forming each group.

Our Message to Industry:

- You now have all the tools you need to educate yourself and raise your awareness on BIM and Digital technology across the AEC sector.
- The BIM regions website is the central location for everything BIM and this will be used across to get access to the latest BIM Case studies, BIM Standard and Guidance documents and to engage with your BIM region steering group members.
- Join your peers in promoting healthy debate in BIM by adding comments and sharing the BIM Regions blog.
- We look forward to the new age of the digital revolution in our industry and the BIM Regions new website is your new source of everything you need to know on BIM.
