Brennan Furlong Architects & Urban Planners

rennan Furlong Architects & Urban Planners, founded by Gareth Brennan and Séamus Furlong in 2015, is an award-winning RIAI registered practice based in Dublin. The work of the practice, a 10-strong design-led studio, is a mix of both residential and commercial projects, and centres on the principle that the well-considered & carefully developed design of buildings and spaces we use every day helps to enrich and enliven the experience and interaction with our built environment.

Each project is viewed as a unique opportunity to collaborate with our clients and the design and construction team as a whole to develop the brief and maximise the potential of each site, incrementally improving our built environment, and our daily lives as individuals, families & communities.

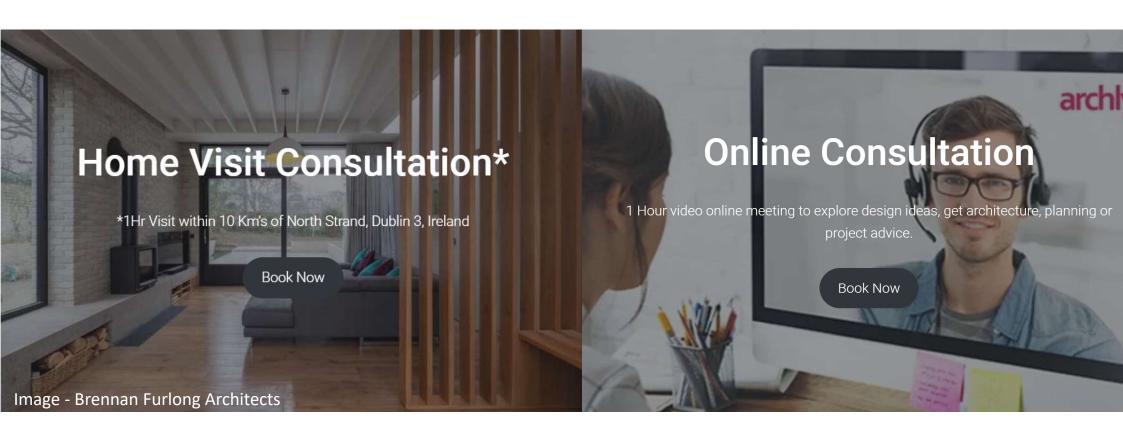

Brennan Furlong is accredited in conservation (Grade III), can act as Project Supervisors for the Design Process (PSDP) and holds full professional indemnity insurance.

Unlocking Small Sites

Our practice conducts in dept and detailed field studies to assess development potential on underutilised spaces. Once we find a space we then reach out to the landowner to assess if they have the potential of the space.

We can then work with the landowner to create a strategy as to the most appropriate way to move forward with the site. Whether advising on the viability and feasibility of the site, securing planning permission for sale, connecting with appropriate developers or even developing the property themselves.

As well as our traditional Architecture role, we advise both public and private clients on strategies for unlocking small sites. Our aim is to encourage appropriate development within the existing urban fabric, activating underused spaces with quality additions to the built environment, in turn securing the greatest returns for landowners.

Below are a number of projects at various stages of the process.

Scheme: Residential - 1 Unit - Back land Site - Zone 2 - Stage: Pre-Application

Scheme: Residential - 12 Units - Zone 2 Stage: Sketch Scheme
