CERTCENTRAL

OVERVIEW

What does CERTCENTRAL® do?

Everything from quality control, to document control
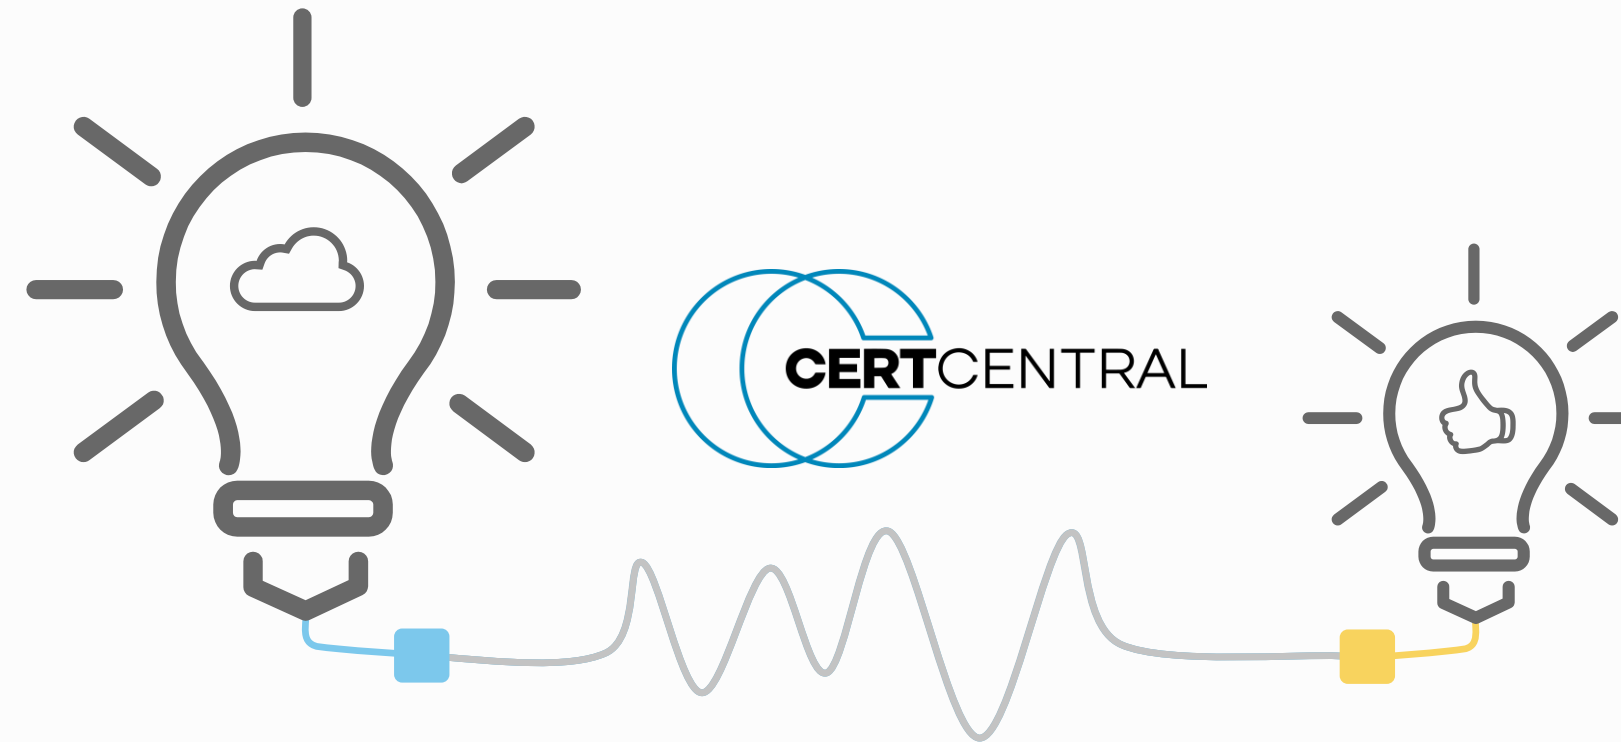

A single source of truth for your project

- **Quality Management**
  - Inspection and test planning
  - Defect Management
  - Quality Benchmarking

- **Query and RFI Management**

- **LEED and BREEAM Environmental Certification**

- **Change Order/Variations Manager**

- **Design Management**
  - Technical Submittals
  - Design Review and collaboration
  - Design Responsibility Matrix

- **Common Data Environment (BIM enabled)**

- **Document Management**
  - Critical Documentation workflows
  - Routing of files to bespoke folder structure

- **Health and Safety**
  - H&S Observations log
  - Incidents, Accidents and First Aids

- **Meeting Minutes Tool**

- **Statutory Consents Tracker**

- **Mobile Applications in iOS and Android**

CERTCENTRAL®

Putting quality at the centre of your project

CERTCENTRAL

Control in the Cloud ☁

All project users have access to CertCentral®, with a secure log-in via desktop and mobile application.

👍 High-Performance

All key project deliverables are tracked via CertCentral®, which has been designed to increase accountability and improve behaviours.

Site Inspection

CertCentral® allows you to track and manage the site inspection process, reducing the need to utilise paper systems and simplifying the defect management/snagging processes.

Design Review

All design development and reviews of technical design submittals are scheduled and managed using Design Deliverables in CertCentral®

Golden Thread

CertCentral® tracks all records of inspection, review, supervision and quality management. It also acts as the common data environment for the project.

Data Analytics

CertCentral® tracks all key performance indicators and highlights risks, allowing you to work smarter and make better decisions.

Planning

Users can build a detailed inspection and test plan with the design and construction teams.

Mobile QA

All project users have access to the CertCentral® Field mobile application, which allows users to inspect, raise queries, access design information, close and review issues
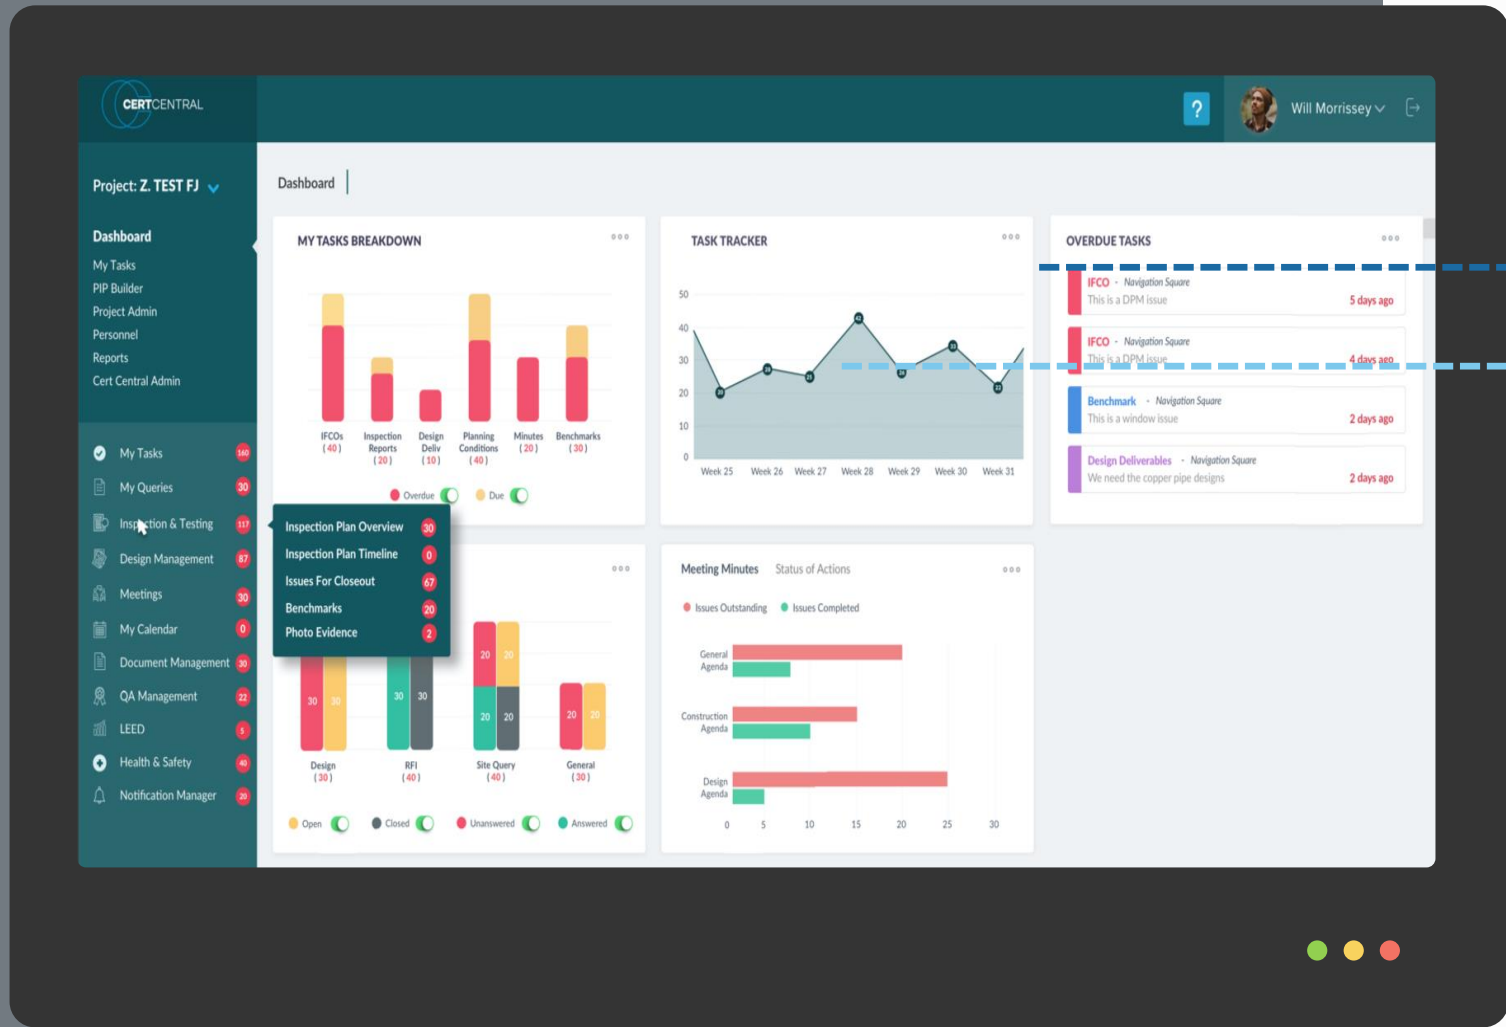

Centralised Dashboard
For Tasks, Analytics and Performance

Real-time
Information is always current

The gift of analytics

Users can track tasks, as well as trends in behaviour. They can identify good and bad performers and manage risks. All in all, this provides users with the gift of information, which can be used to make better decisions.
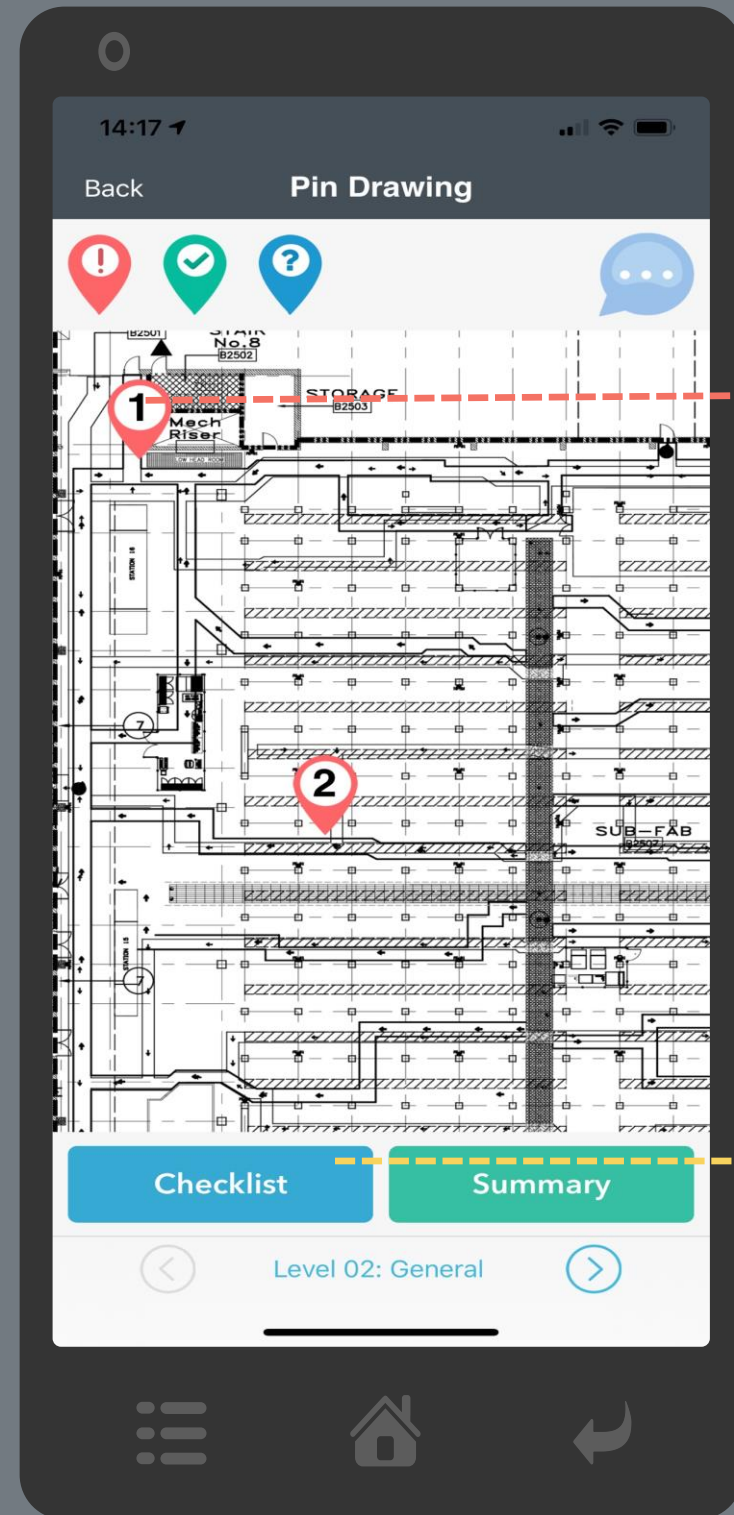

Searchability

Every data point in the dashboard is linked to a detailed log or tracking tool in CertCentral®. Each of these is instantly searchable.

CertCentral® Field App

Project controls in the palm of your hand

Seamless Link

between the project site and the office

Digitalise Quality Assurance

Companies can import and digitalise checklists and forms, removing the need for paper and scanners + saving time and effort

Issues, Queries and Progress Photos

All site issues and queries can be raised, capturing locations, descriptions and photographic evidence.

Site Quality Issues tracked
by Contractor, Reviewer, Discipline and Work Package

Active Defect Management

Today, quality is everyone's job and with CertCentral® responsibilities and accountability are clearly set out for all project users. Issues are raised using our mobile application, tracked on the Issues Log and displayed using our excellent project dashboard. All issues are closed out using photographic evidence and must be formally reviewed and accepted.

As all issues are linked to the Uniclass 2015 nomenclature, we can track trends by work package and ensure that risks are mitigated.

Contractors

Benefit from a clear unambiguous list of issues and a simple mobile tool for managing quality

Designers

Benefit from a mobile application which allows them to raise and review issues + live data analytics

Queries + RFIs

Getting the answers you need

Focussed Communication

Instant notifications and live reporting of statuses

MY QUERIES BREAKDOWN

Design (30)	RFI (40)	Site Query (40)	General (30)
30 / 30	10 / 10 / 30 / 30	20 / 20 / 20 / 20	20 / 20

- Open
- Closed
- Unanswered
- Answered

Multiple Query Types

Users can track multiple query types, from design queries to contractual RFIs. Users can also set up Private Query channels for topics such as commercial queries
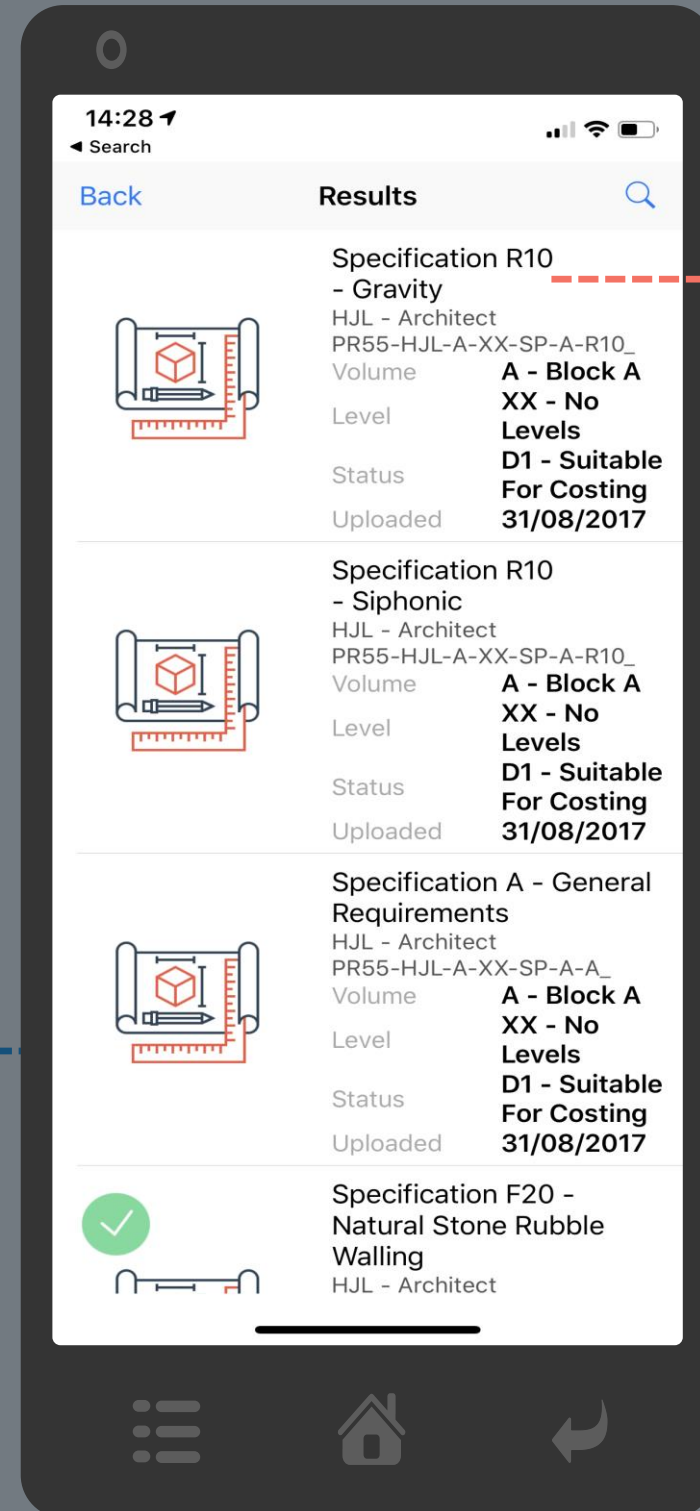

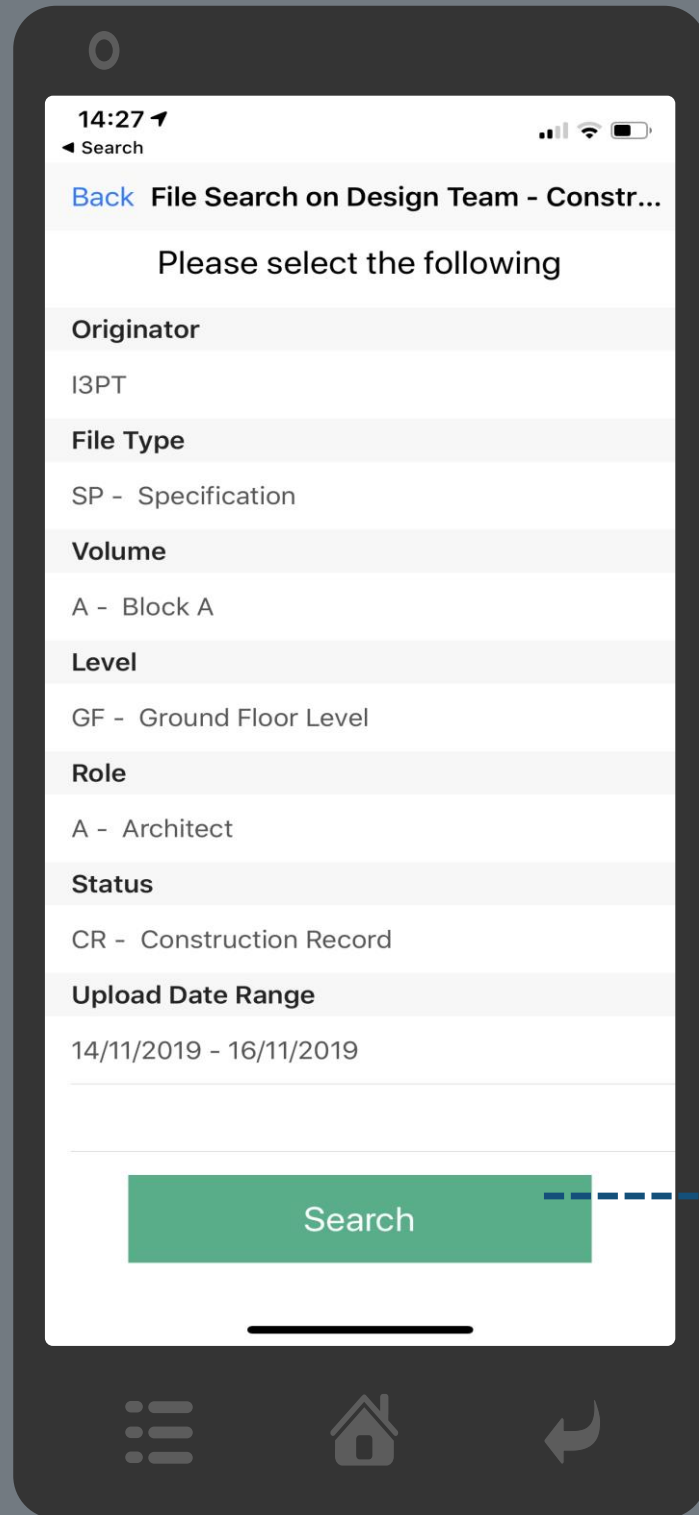

Live Status of all Queries

All queries have dual statuses indicating whether they are answered or unanswered, as well as whether or not the answers have closed the query.

CertCentral® Field App

Design data in the palm of your hand

Seamless Link

between the design team and the construction team

Access Design Data

Users can search and filter the common data environment from the field, searching by originator, file type, block, level, role, status or date.
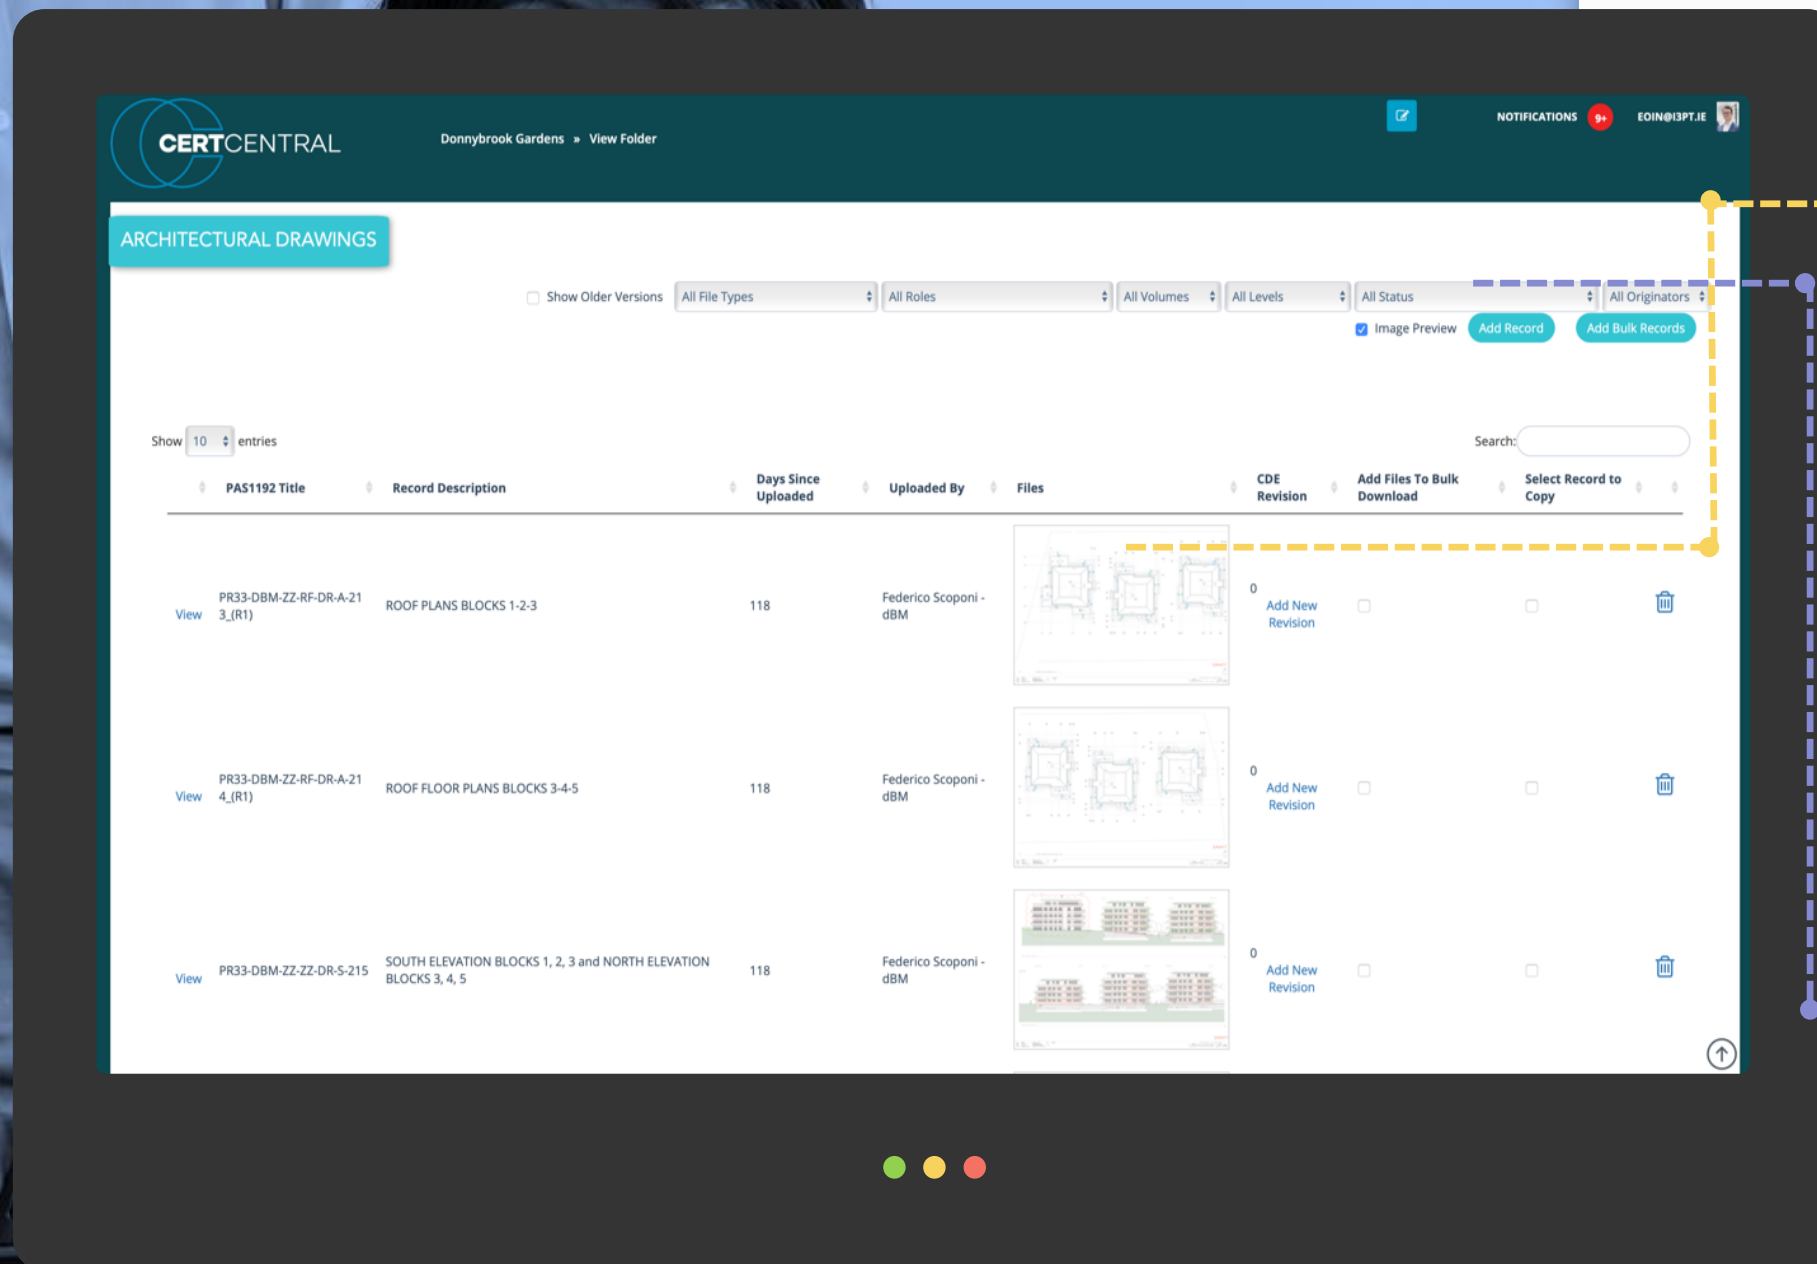

Filter + Download

Users can further filter by search word and download an off-line copy for mark-ups on site.

File Manager

Designs communicated quickly and easily

Common Data Environment

We've simply made it easy to find + add information

Filterable + Searchable

This ISO 19650-compliant CDE is instantly filterable by Sub-code, Volume, Level, Role, File Type, Originator and Status. Also, our instant word-search and bulk-upload facilities are incredibly quick and intuitive.

File Preview

Users can see a thumbnail image preview of the file in the list assisting with a quick and easy search.

The gift of improved quality

Once implemented, CertCentral® offers clients and project teams is peace of mind that quality is being managed and demonstrated. This process protects the value that everyone works so hard to create, yet can often be destroyed through errors and poor communication.

We have all seen what can happen when quality is not placed at the centre of a project. CertCentral® is the "Golden thread" which the industry needs to make sure that we don't repeat the mistakes of the past.
