

Modularisation and Offsite

Introduction

Lindbäcks is one of the leading modular construction companies in Sweden, the company has been in business for more than 95 years and is still learning.

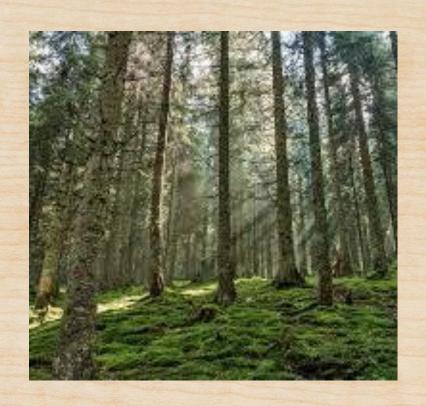

This talk will be about modular construction in Sweden, **digitalization**, sustainability and effects of Covid-19

Where are we now and what can the future bring?

Lindbäcks
Rational Construction
Healty Living

Modular construction in Sweden

45% of housing constructions have some level of offsite construction (panel or modular)

Different types of frames, many utilizing high quality timber

Sustainability, time, quality are driving forces supporting modular construction

Delivery range from product to project, from single family to multi family/hotels/student/retirement homes

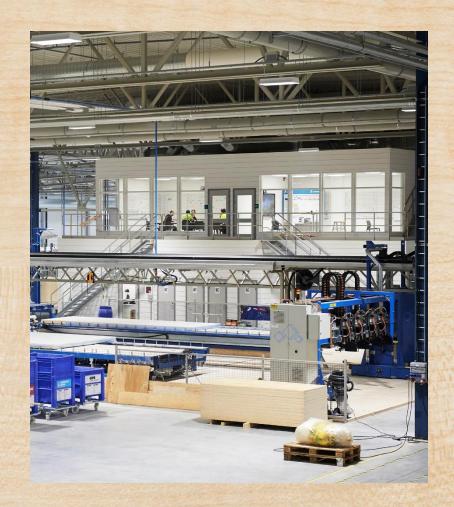

From ordering from catalogue, configuring on line, traditional tender on set project to Collaboration from idea to finished project

Number of modular construction companies on the market has increased (both domestic and international)

Rationellt byggande.
Sunt boende.

2-8 story family housing

Condominiums

Student housing

Digitalization - Where are we now?

Construction business in general in Sweden

- Starting to mature, some have reached further than other, most know they have
 a journey ahead of them, very few think they can do nothing in the area of
 digitalization and still be in the game.
- A recent poll within the construction industry in Sweden shows that 83% of the workforce believe in digitalization and 97% think they will use more digital solutions within the coming 3 years.

At Lindbäcks

- We have invested and implemented quite a few digital tools to support our processes over the last eight years:
- Small increments continuous improvements (80%)
- Experiments to test, evaluate and learn (20%)

Examples of what we have done so far

Lean Pricipals:

Planning

Deviations

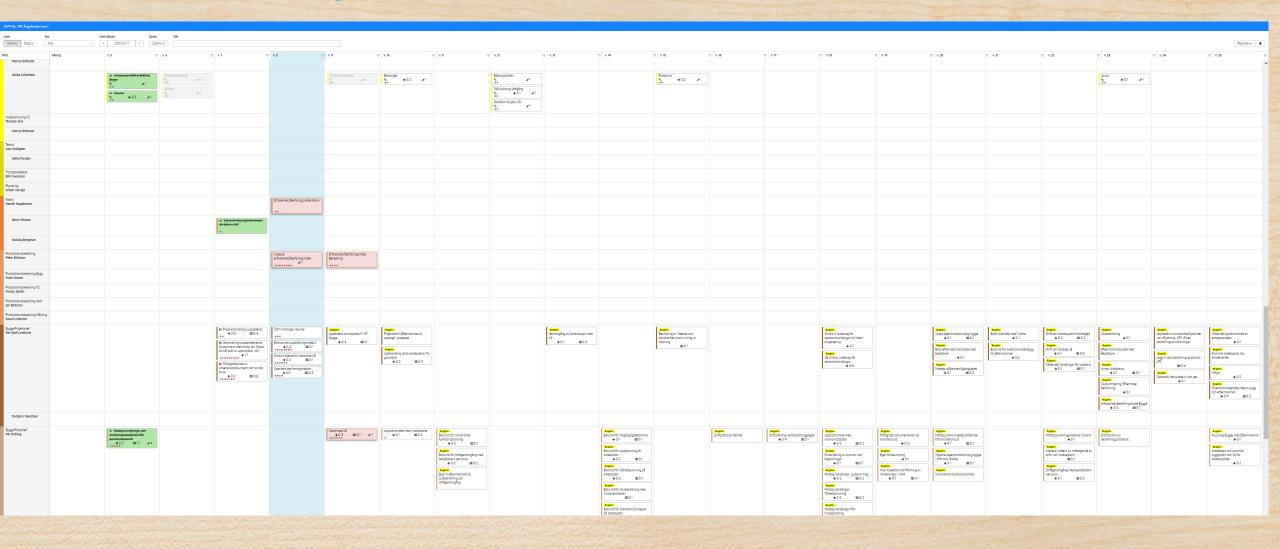

Daily huddles

New factory

Lindbäcks live

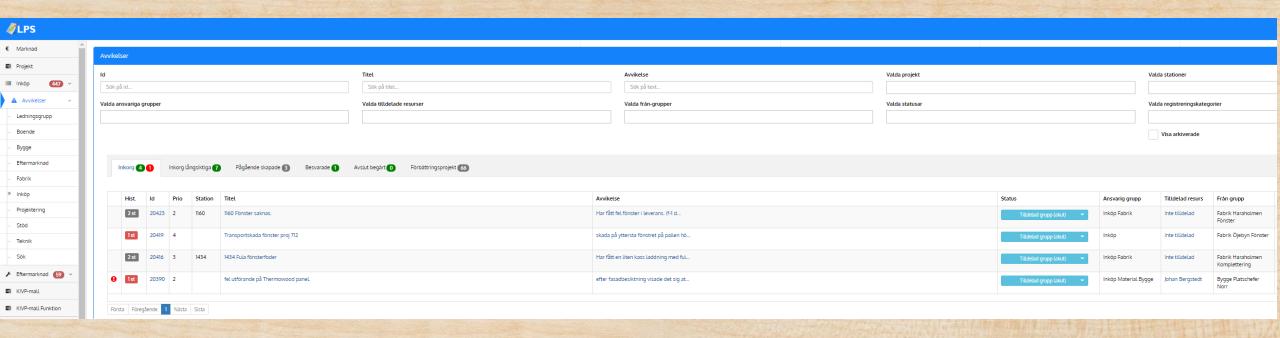

Planning - KIVP (Knowledge Innovation Visual Planning)

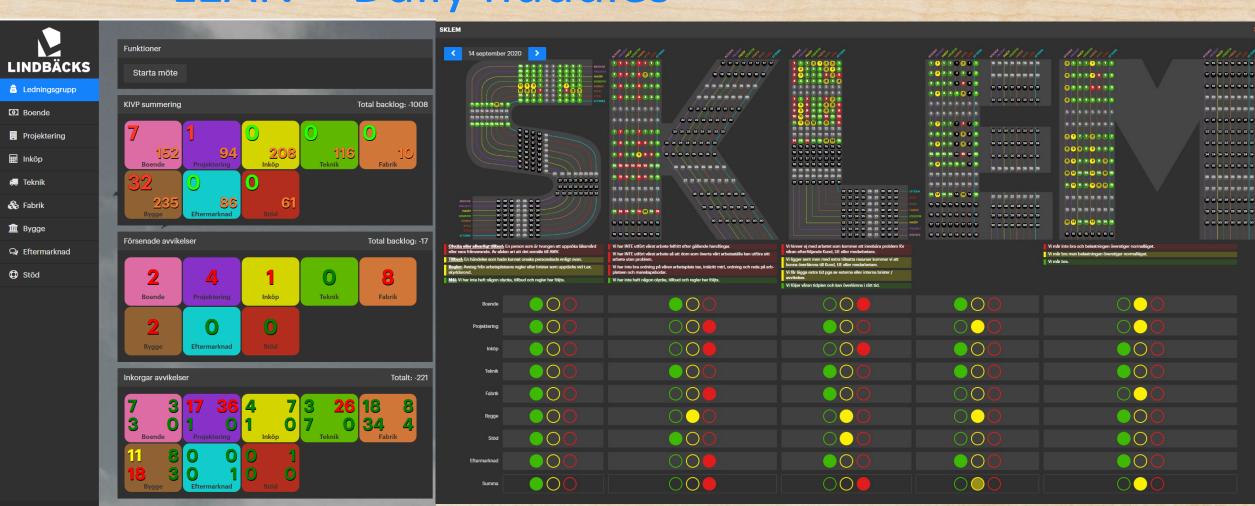

Rationellt byggande. Sunt boende.

Deviation reports and analysis

LEAN – Daily huddles

The new factory

10s-project

- Drawings
- Standard Operation Sheets
- Bill of Materials

Digital quality controls

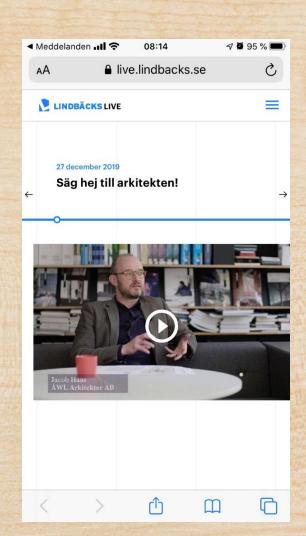

Lindbäcks Live

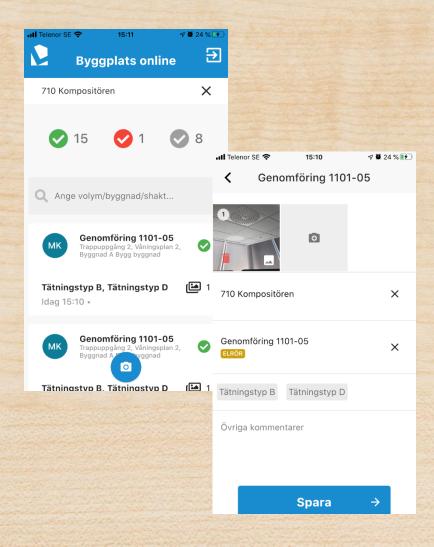

Looking ahead

Incremental improvements

- With focus on the end to end process and interoperability (program, machine, organisation, human)
- Infrastructure that enable us to implement and take advantage of new technologies smart data storage, integration strategy to decouple systems
- Holistic view on system map platform approach
- Solution that can support the construction sites
- Develop BI to enable more fact driven decision making
- Support sustainability strategy
- The digital delivery in our product

Innovation project

- Collaboration with the academy and IT-sector:
 - Uppkopplad Byggplats The connected building site
 - Arrowhead tools
- Evaluate practical use of new technologies and solutions:
 - Digital Twins (machines and buildings)
 - Evaluate: RPA, Virtual and Mixed reality (instructions)
 - Drowns for monitoring (quality, progress)
 - Sensors (moist, movement, temperature during construction phase and onwards)

Sustainability at Lindbäcks

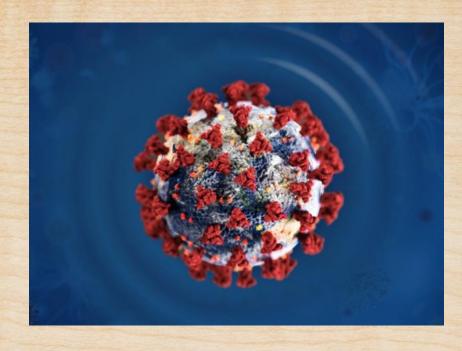

COVID-19

Liberal restrictions in Sweden:

- wash your hands
- keep physical distance
- Work from home if you can do your job from home
- If not stay home if you have the least symptom

Impact for Lindbäcks

- Minor short term few material shortagesbut non stopping production
- More concerned about the long term
 effect of the economy and the will to invest
