

The
5D
Fifth Dimension

The logo features the text 'The' in a small, light blue font above a large, bold '5D'. The '5' and 'D' are filled with a vertical gradient from blue at the top to green at the bottom. The 'D' is further divided into three segments by two diagonal lines, resembling a pie chart. Below the '5D' is the text 'Fifth Dimension' in a bold, light blue font.

The Challenge

Digitising the commercial management process so that the entire project cost evolution is collected, reported and stored in one cloud based solution

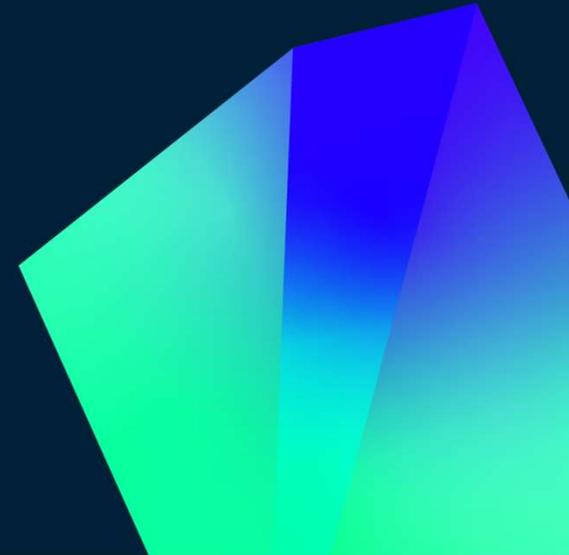

The Challenge

**Today we use different tools to manage
all of the important commercial processes
on a construction project**

The Challenge

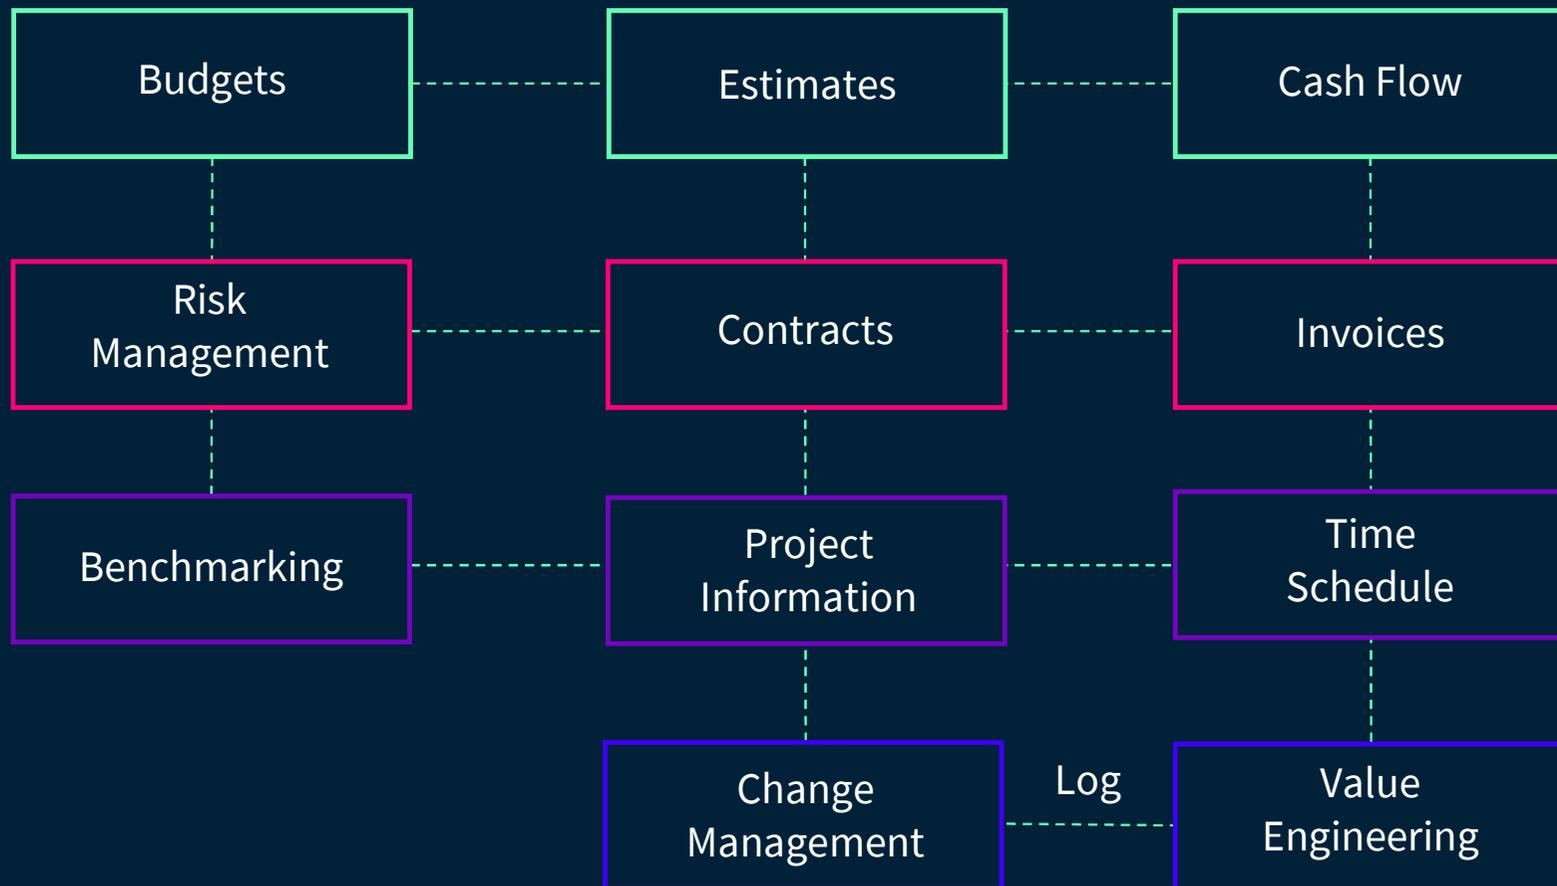

How do we link all of these processes together from day 1 so the information can be tracked, stored and used for analytics & benchmarking on future projects?

How do we go from this...

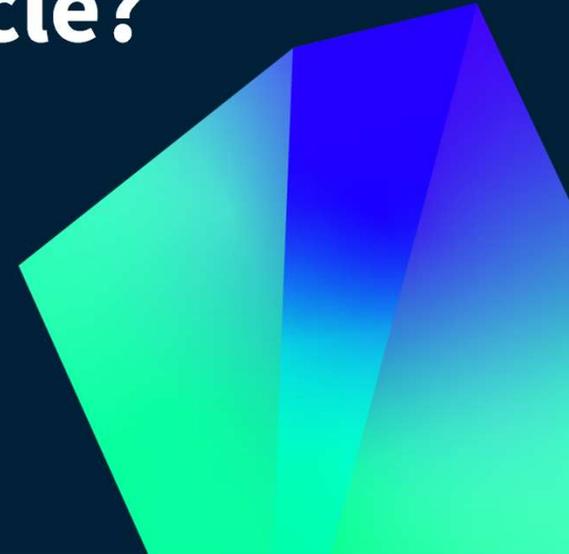

...to this?

The Challenge

How do we improve our budget accuracy as well as our project control while also storing valuable commercial information along the project lifecycle?

The Challenge

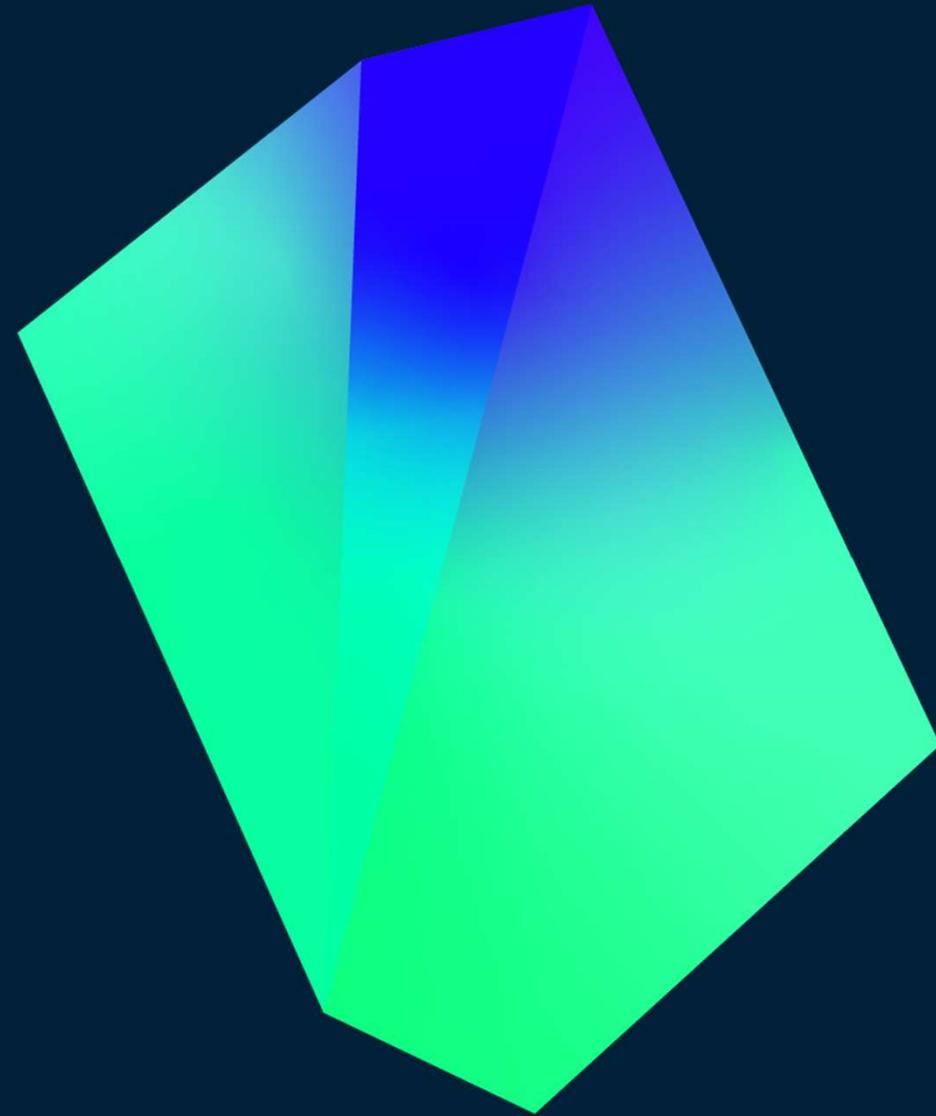

How do we collect real time, real project, accurate commercial information in one digitised platform resulting in a national or international database of industry commercial information/data?

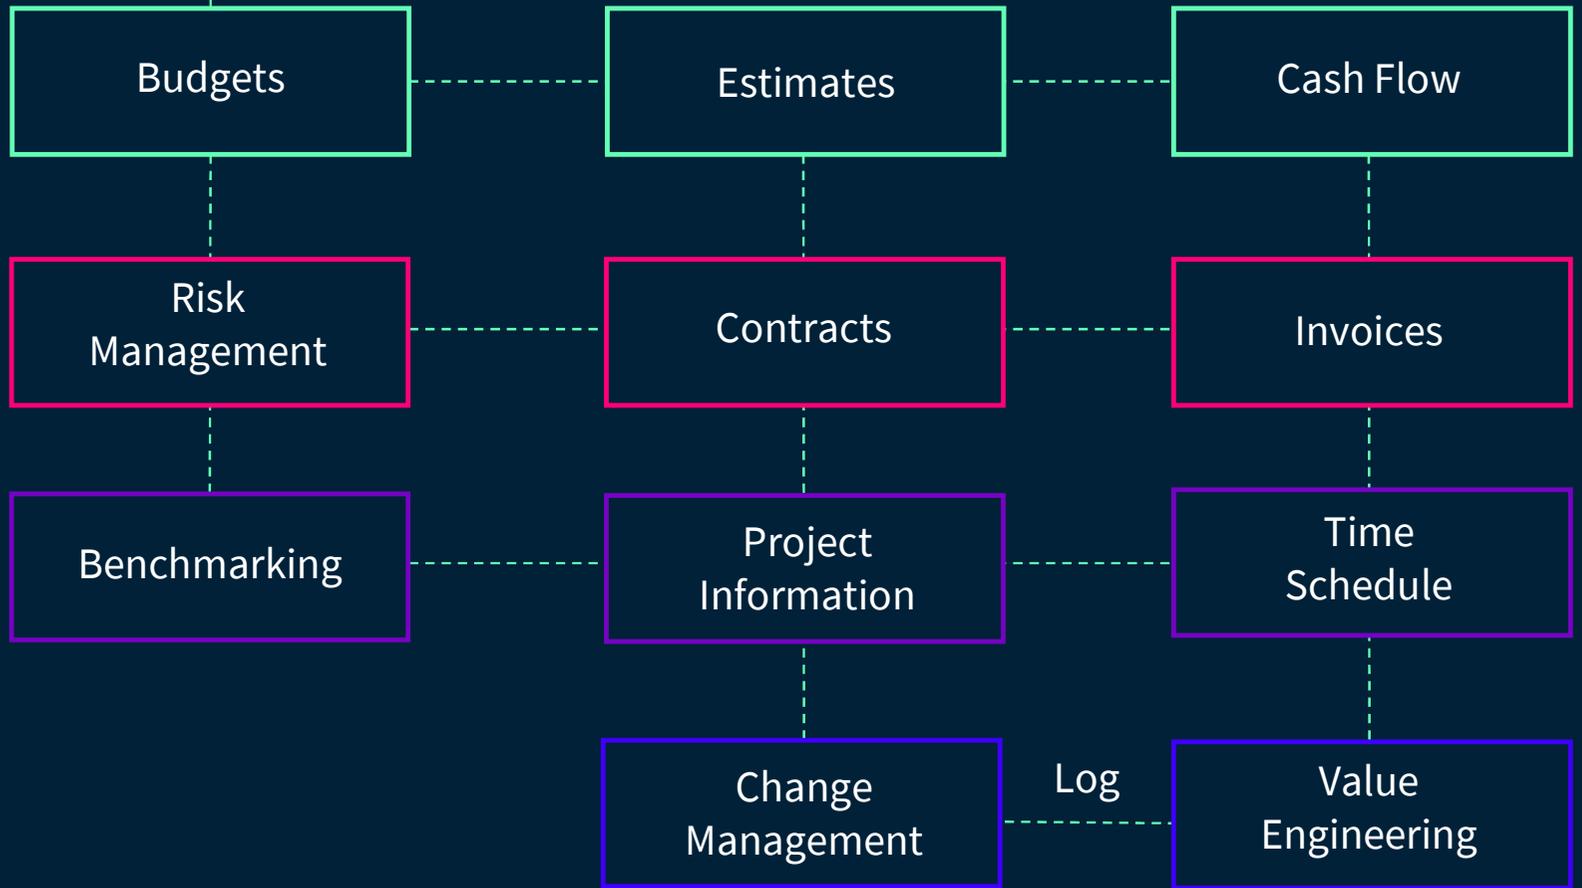

THE FIFTH DIMENSION

*The future of cost management,
monitoring, reporting and analysis*

Focusing on

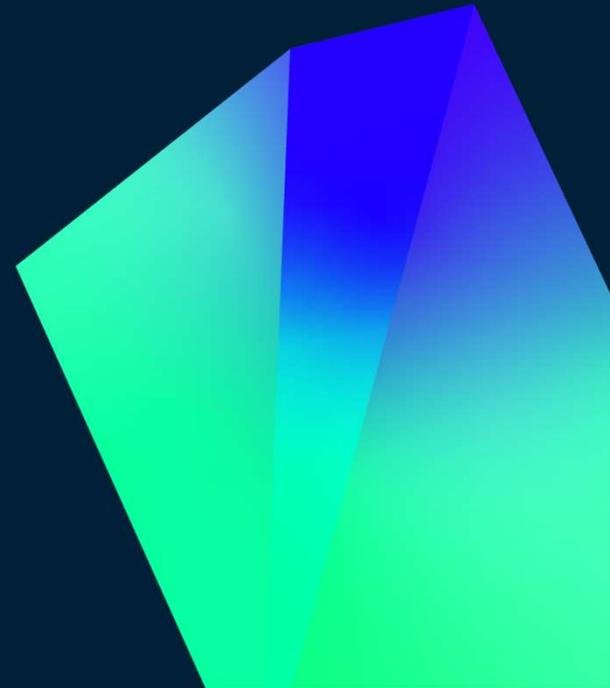

- Projects
- Benchmarking
- Map
- Dashboard
- Risk management
- User cash flow
- Contracts
- Invoices
- Log
- Clients
- Users
- Dimension tables

The Fifth Dimension

Digitises & automates traditional tools

- Removing the need for complex excel sheets for budgeting, estimates, controlling
- Removing the need for monthly reports
- Removing the need for preparing monthly presentations for reporting
- Removing the need for project status emails
- Providing a database tool for benchmarking

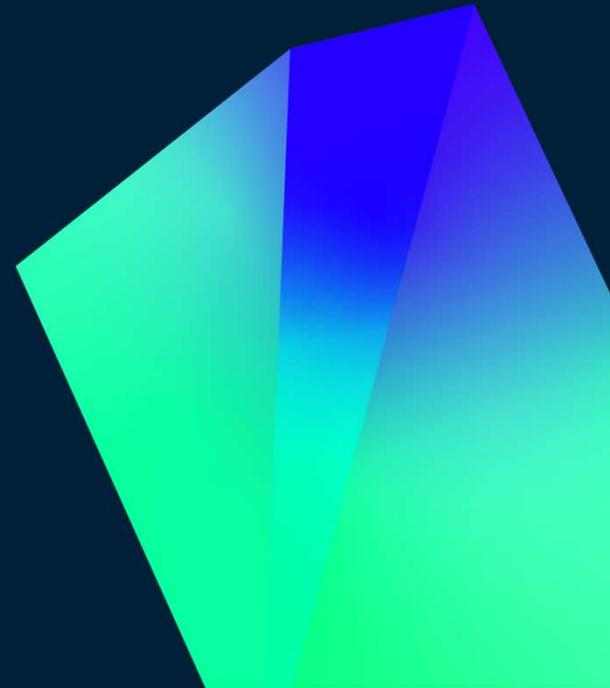

The Fifth Dimension

Takes static information from common tools, (excel, word, pdf , email)

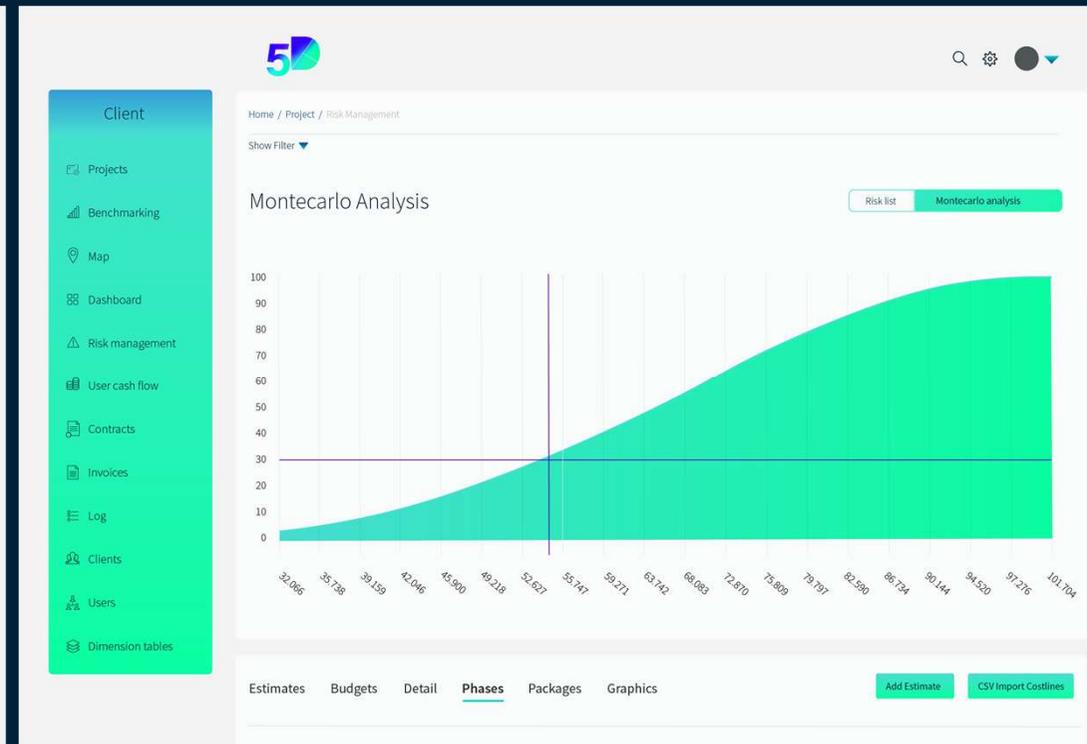

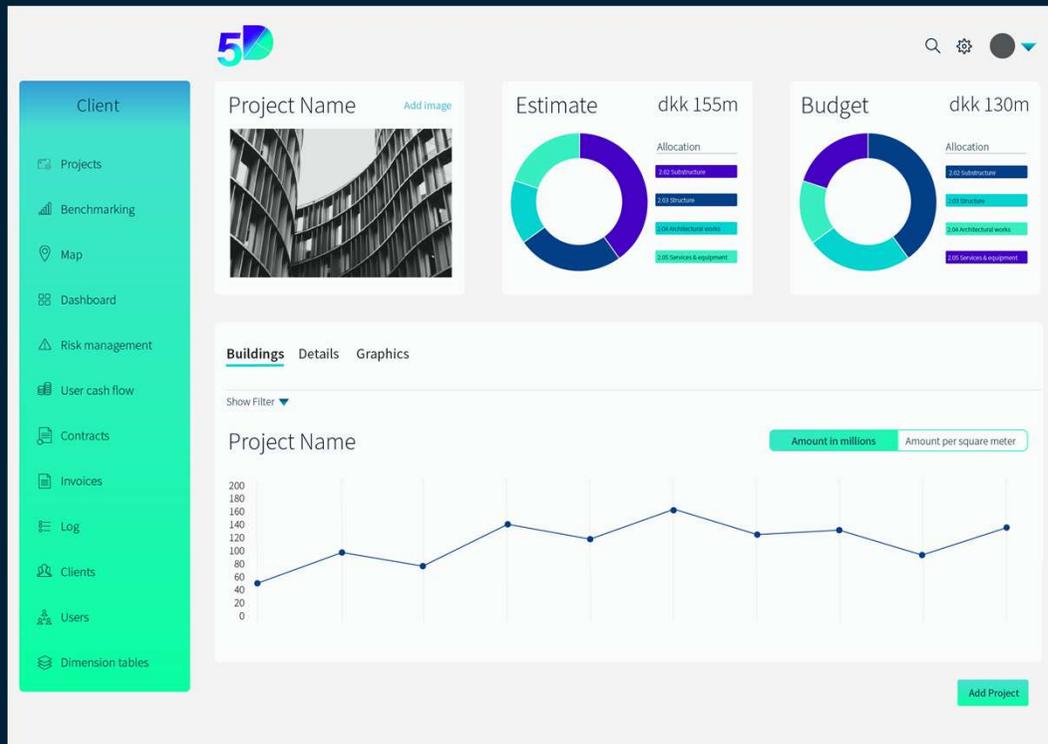

We standardise & digitise this information, so that it can be analysed

- The information stored in these files is essentially dead & we want to bring this data to life to make it generative & current
- Improve its value, & the potential it can have for clients through visual representation
- Collect vast quantities of data on all your construction projects, stored in a data base & used to develop the next business case

The Fifth Dimension

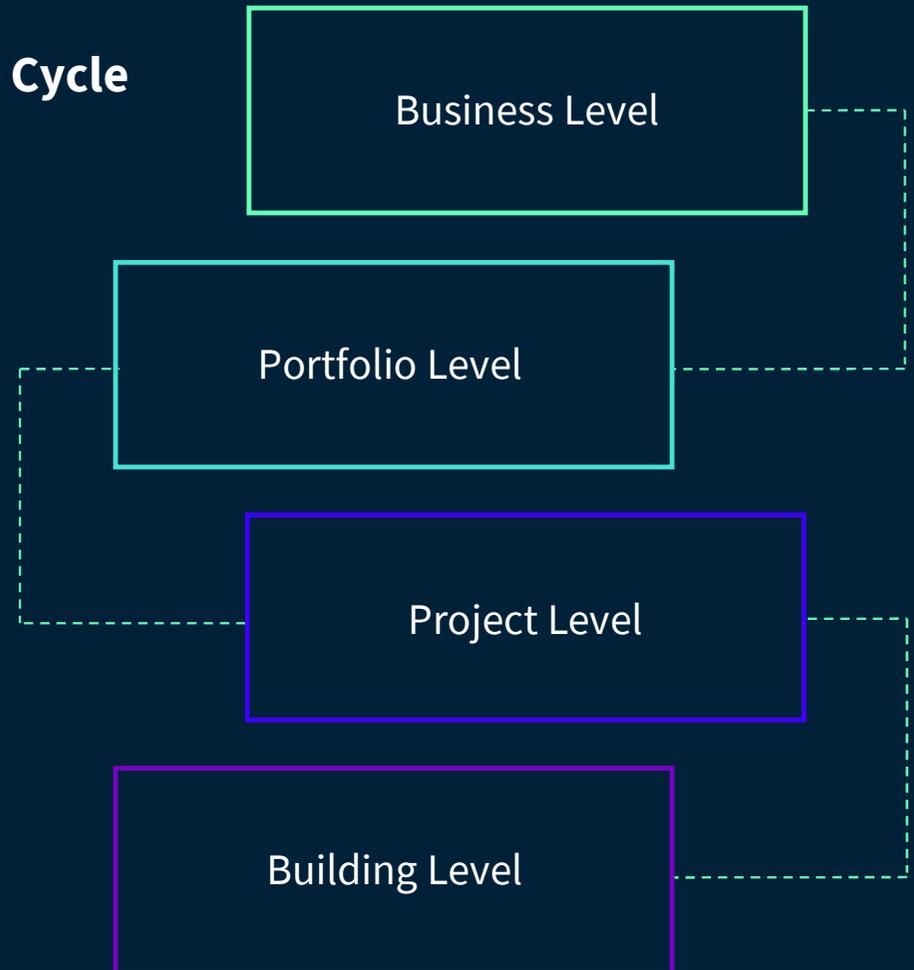

Creates visual tools to represent the project commercial information

The Fifth Dimension

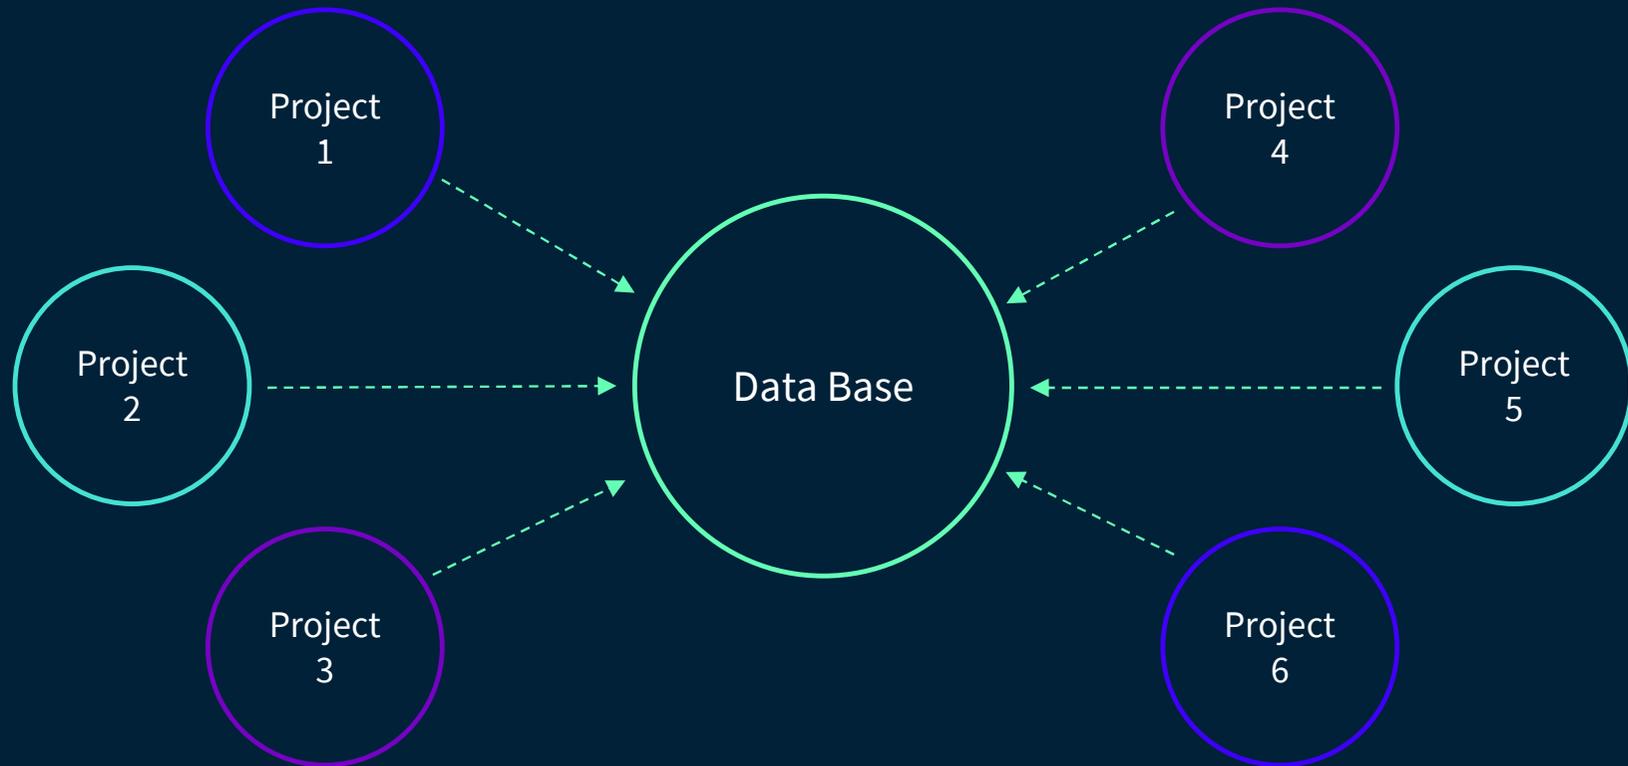

Manages the entire commercials of the project Life Cycle

- All the projects in your business
- All the projects in a portfolio
- Each building in a project

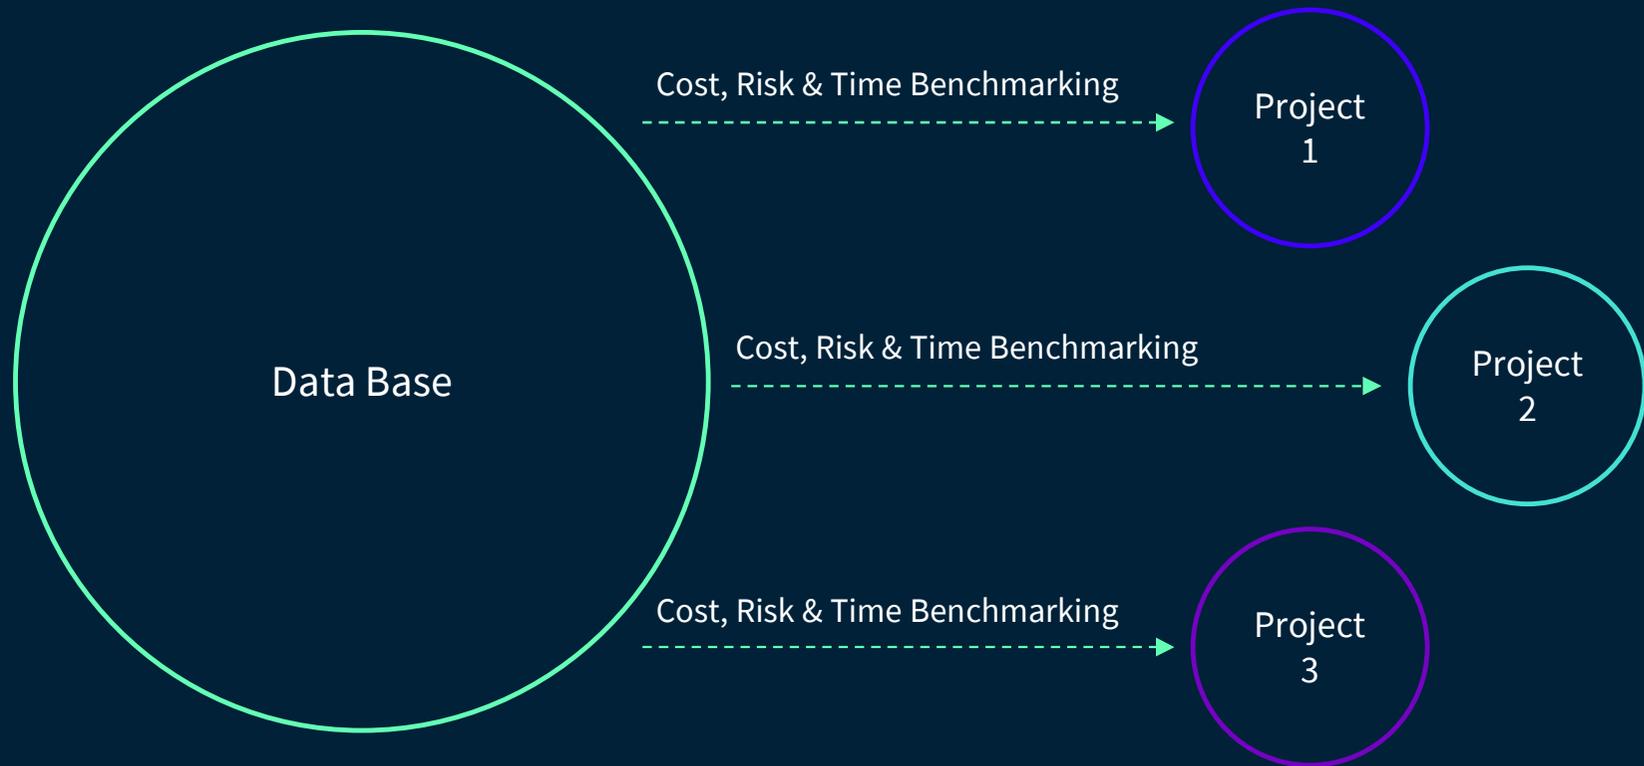

The Fifth Dimension

Creates a centralised data base for all construction projects

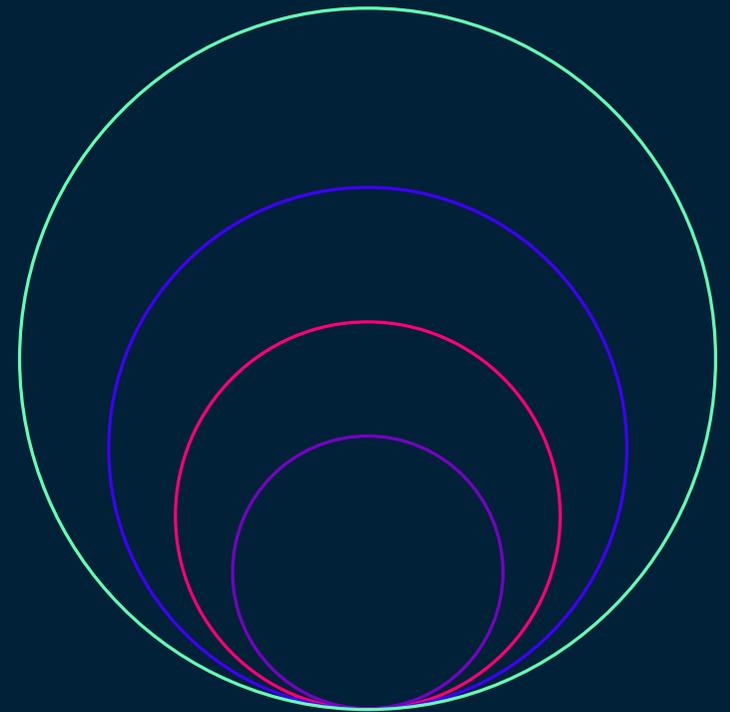

The Fifth Dimension

Creates a centralised data base for all construction projects

By...

- Using internationally recognised standards for cost
- Interconnectivity to other project platforms
- AI for data analytics & benchmarking, assessing the entire systems data base of historical information
- Delivering it all in a user friendly dashboard solution
- Closing the loop on project cost circularity

Who is The Fifth Dimension for?

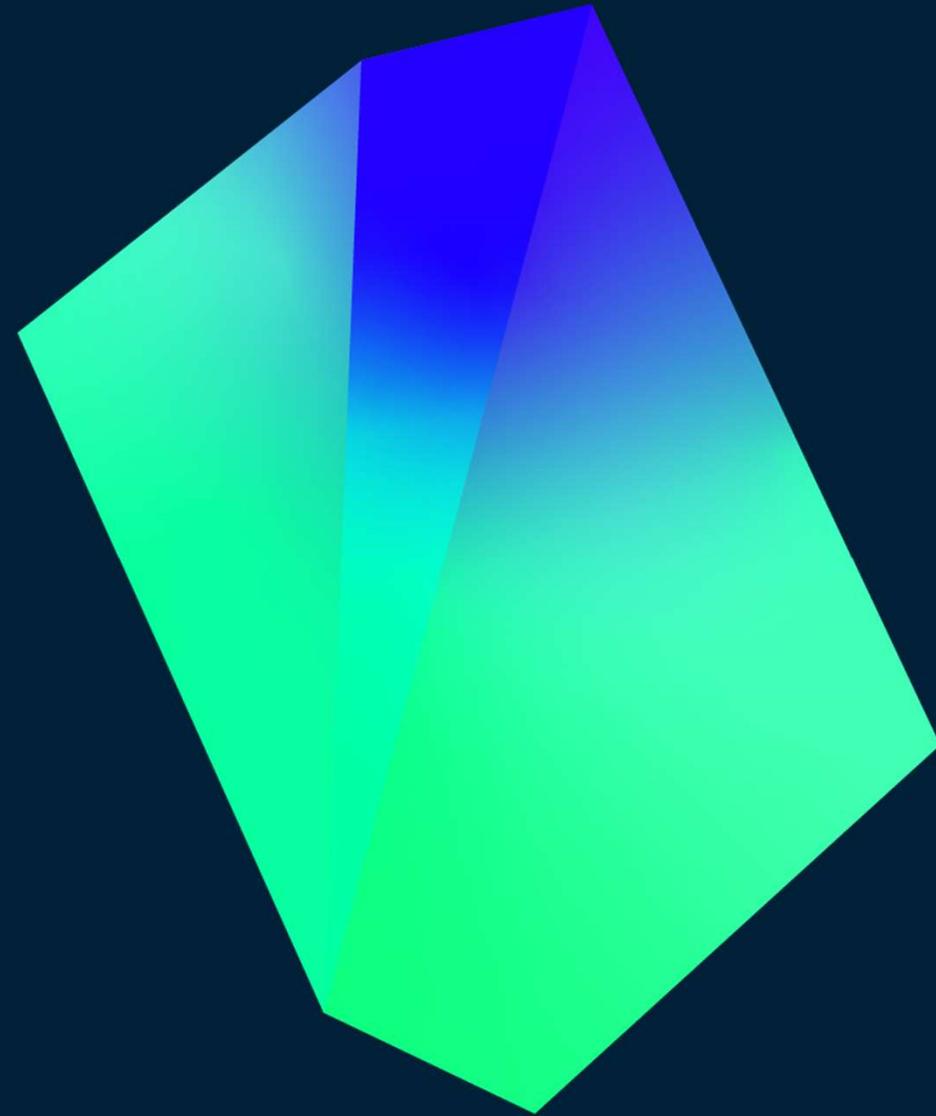

- *Quantity Surveying Practices who want to digitise their cost reporting & build a relevant accurate cost data base*
- *Developers who want to track their entire portfolio & learn from previous projects to increase value*
- *Public authorities who want full transparency & governance*
- *Investors who also want full transparency on their investment*

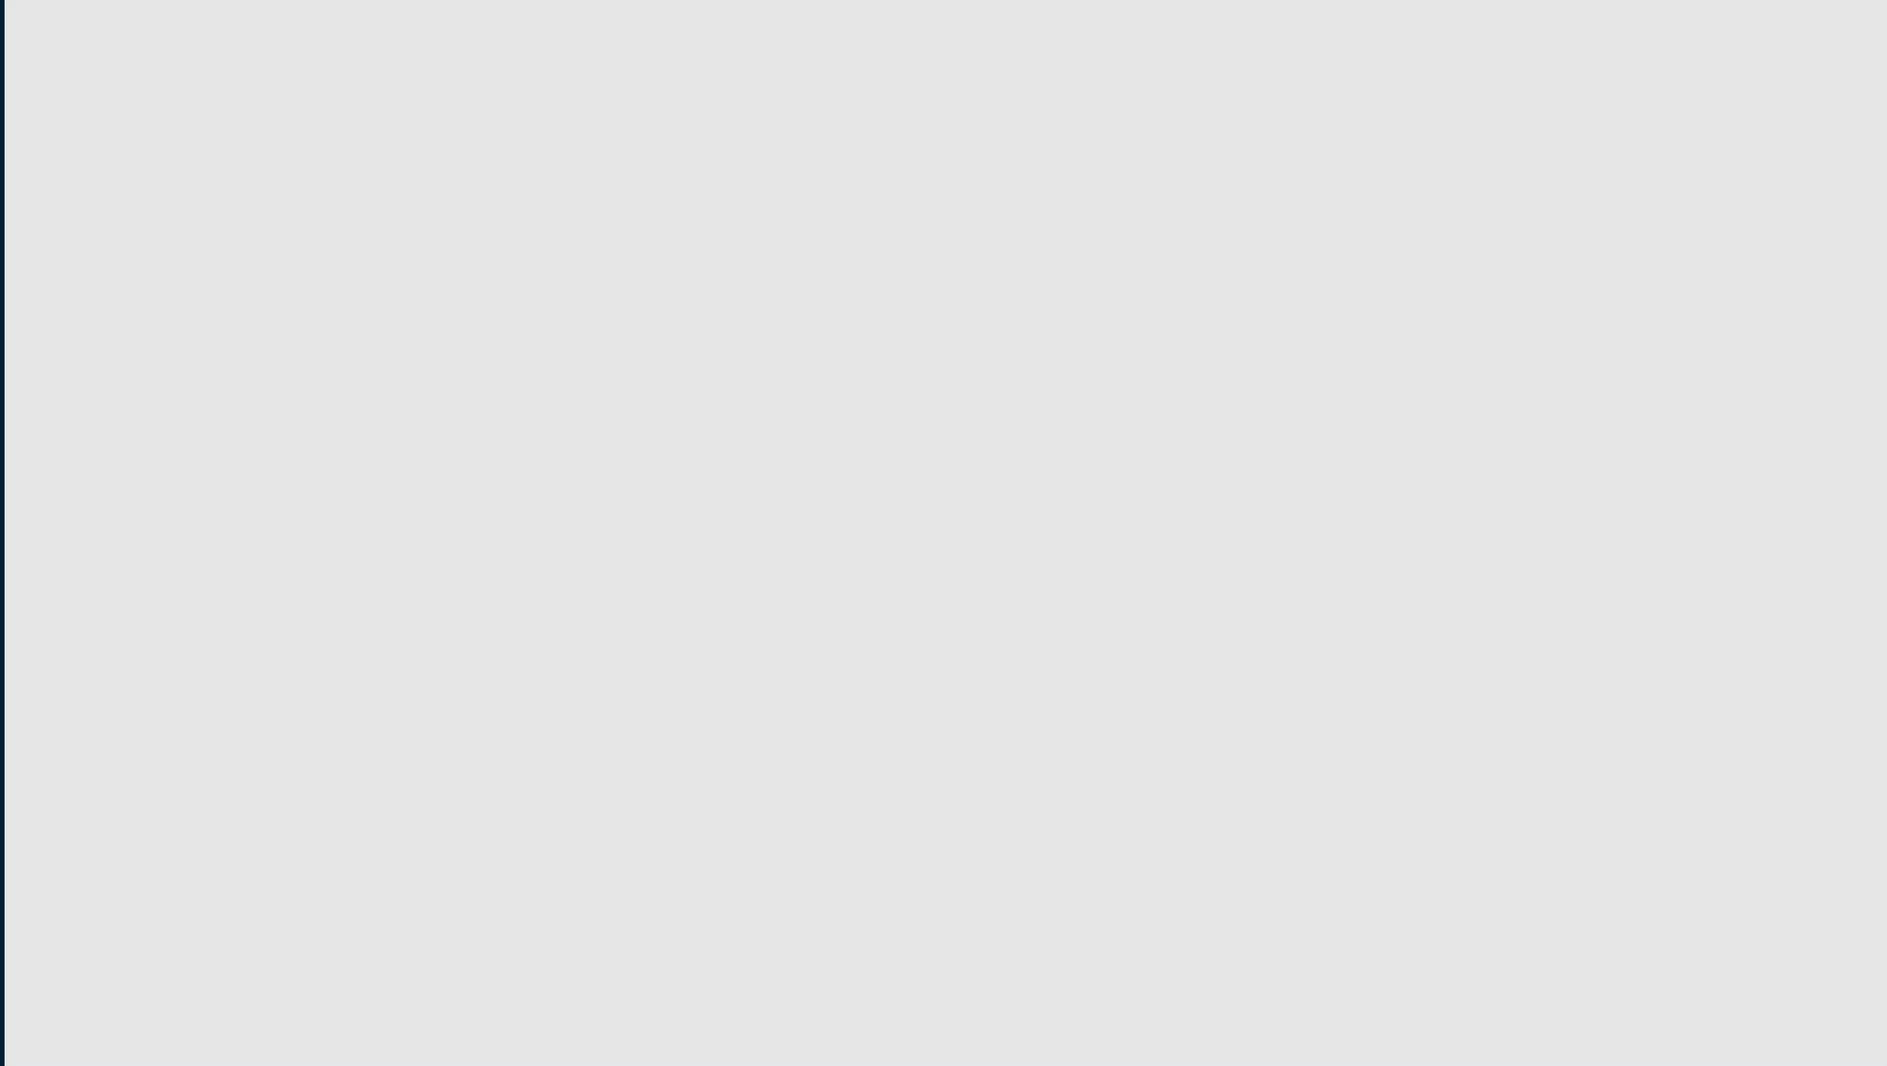

THE FIFTH DIMENSION

*The future of cost management,
monitoring, reporting and analysis*
