ADDNODE GROUP

About me

Sean O Dwyer

- AEC Division Manager for Procad / Symetri with over 20 years' experience
- Expansive experience in all aspects of the construction sector from design perspective to main contractor involvement
- Specialise in BIM360 and all Cloud related offerings from Autodesk
- Elite Specialised

sean.odwyer@symetri.com

AEC Collection Tools

AEC Collection (Cloud Saving)

Revit - Built for BIM. Intelligent model-based software. Plan, design, construct and manage buildings and infrastructure projects.

AutoCAD - Software for 2D and 3D CAD. Work with TrustedDWG technology.

AutoCAD Architecture - Speed architectural design and drafting with an industry specific toolset that includes intelligent objects and styles. [Included with AutoCAD.](#)

AutoCAD Raster Design - Use raster design tools in a specialised toolset to edit scanned drawings and convert raster images to DWG objects. [Included with AutoCAD.](#)

Dynamo Studio - Dynamo Studio is a standalone programming environment that enables designers to create visual logic to explore parametric conceptual designs and automate tasks.

FormIt Pro - Enables architects to sketch, collaborate, analyse and share early-stage design concepts.

Navisworks Manage - Project review software empowering architecture, engineering and construction professionals to review integrated models and data, driving better outcomes.

ReCap Pro - Use ReCap reality capture to convert reality into a 3D model or 2D drawing that is ready for further design.

Autodesk Rendering - With cloud rendering, you can take advantage of virtually infinite computing power to create photorealistic and high resolution images in less time.

Revit Live - Revit Live cloud service turns Revit and Revit LT models into an immersive experience in one click, helping architects understand, explore and share their designs.

3ds Max - 3D modelling and rendering software. Create stunning scenes for design visualisation and engaging virtual reality experiences.

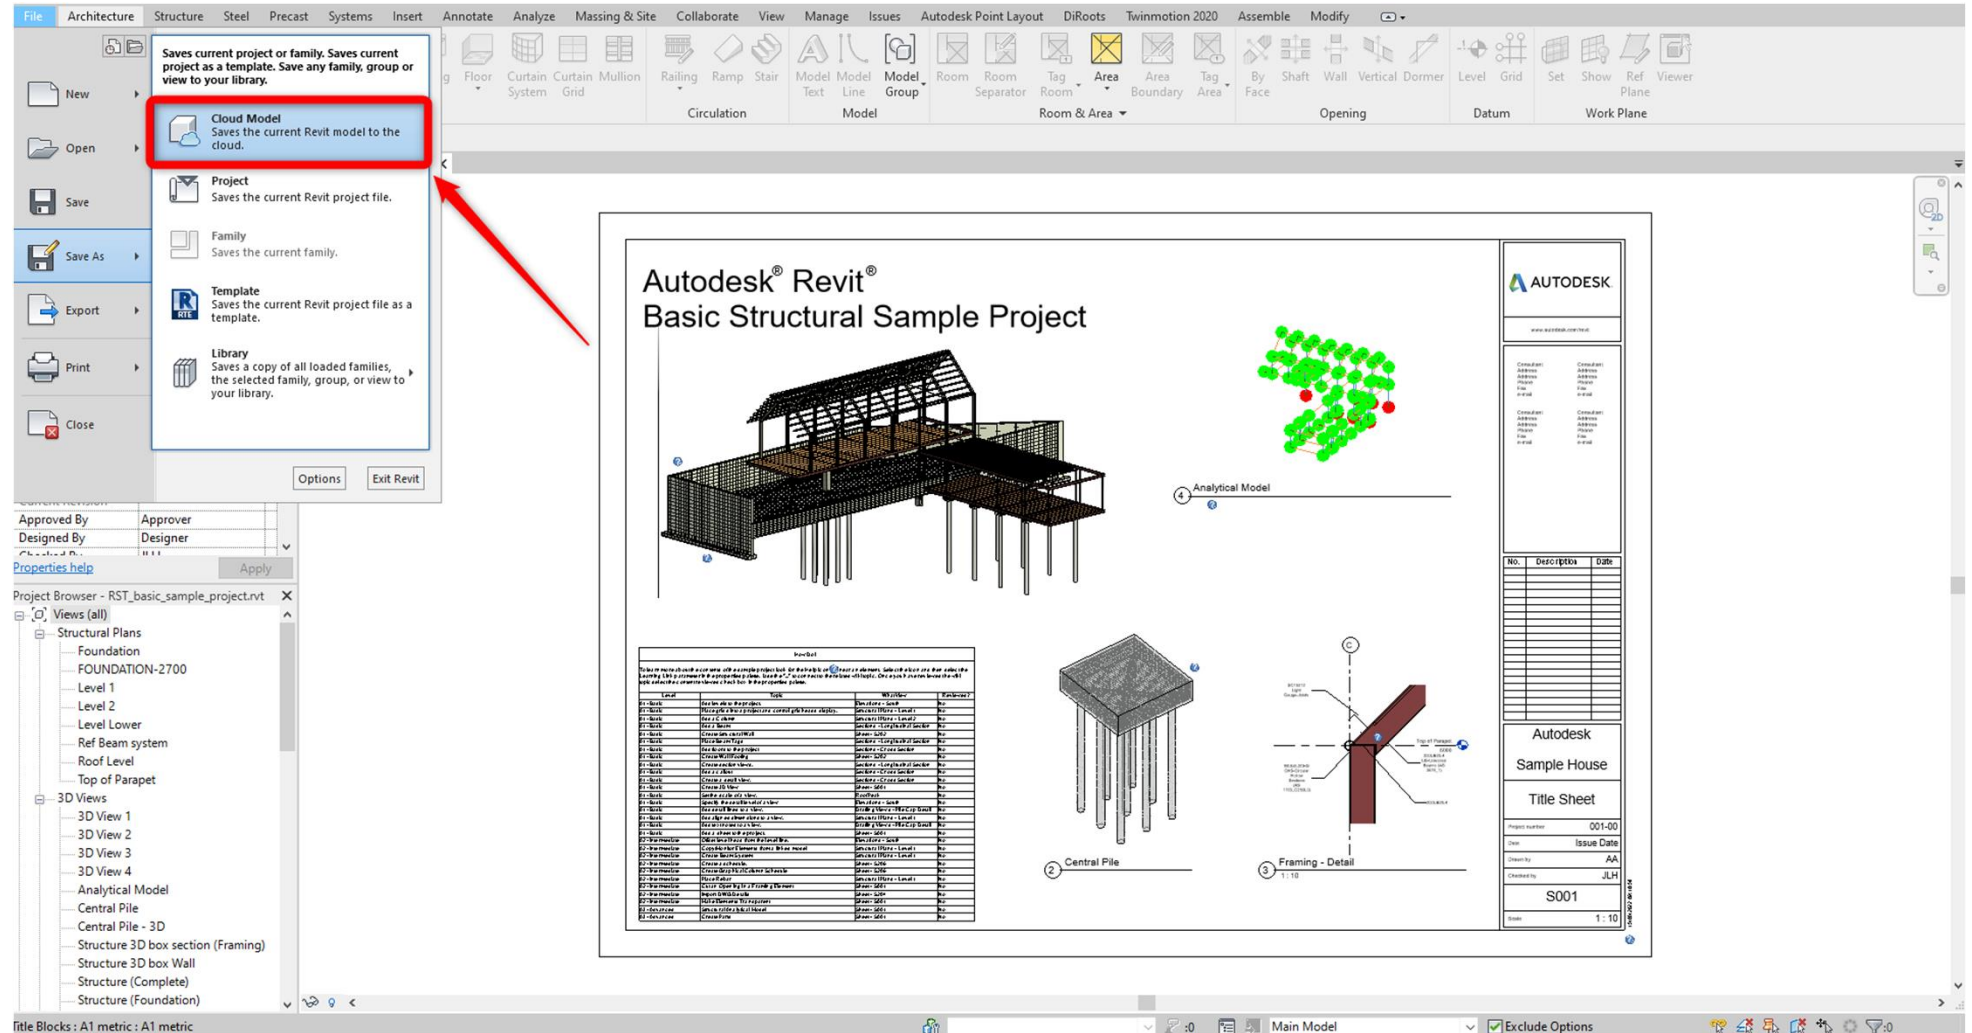

AutoDesk Docs/ BIM360 Docs - Ability to save and host your files in a cloud hosted environment.

SYMETRI OWN TECH AEC

Naviate® for Revit

NAVIA TE[®] ACCELERATE

Provides all the features found across the AEC industries, from collaboration, productivity and documentation.

NAVIA TE[®] STRUCTURE

Provides you with a large library of completed object types, standard profiles and foundations.

NAVIA TE[®] REBAR EXTENSION

Automates the process of generating reinforcement for elements like beams, columns and piles.

NAVIA TE[®] DAYLIGHT

Automates daylight area ratio checking of your BIM model for optimising design decisions.

NAVIA TE[®] ELECTRICAL

Allows Electrical designs to be created simultaneously in both 3D and 2D

NAVIA TE[®] ARCHITECTURE

Adds the advantages and possibilities to make you more efficient when working with Revit and BIM.

NAVIA TE[®] SITE & LANDSCAPING

Fully customised to the needs of landscape architects – including content, tools and workflow.

NAVIA TE[®] LANDUSE

Provides tools to create a zoning plans in Revit according to regulations.

NAVIA TE[®] HVAC & PLUMBING

Provides ventilation and piping systems design in full 3D.

Naviate® for Civil 3D

Enables efficient and dynamic project design. Included in the software are templates and network parts lists that conform to industry and national standards.

Let's you to design your surroundings more efficiently with elevation editing commands, volume calculation methods and visual styles and templates.

Provides access to templates and setting files for local standards, as well as functions that together with Civil 3D create an efficient workflow.

Get a large library of road signs as well as a dynamic tool to create your own signs. Dynamic road-markings are created around native Civil 3D objects.

Naviate® for Cloud

Access classification in Autodesk Revit and your BIM model. Supports many standards and is built on CCS as the core standard..

Ensures seamless communication between your desktop and the Naviate Nexus Portal project.

Enables standardised communication platform by Naviate for the construction industry to handle building classification codes.

Enabled digital twin project handover from BIM 360 & ACC.

Provides easy to use IFC data and workflow.
